DEAR ALLIE,
MAN M.&M. FREAK,
YEARS RIGHT AROUND
THE EDGE. NEXT YEAR COLLEGE
TIME & PARTY TIME, EH? WELL, GEEZ
I DON'T KNOW WHERE TO START. WE'VE BECAME
GOOD FRIENDS IN A PRETTY SHORT WHILE, HUH?
(BETTER NOT START THERE; IT'S GONNA TAKE A-EVER)
WELL, YOU'VE BEEN PRETTY COOL TO ME, IN FACT, JUST
ABOUT EVERYONE IF YOU DON'T WATCH YOURSELF YOU'RE
GONNA BECOME BANKRUPT & CRAZY TO BE WITH.
HAVE BEEN PRETTY FUN & YOU & BRANDIN, WEIRD
YOU GUYS FIGHT SOOOO MUCH / BUT ARE STILL
FRIENDS, RIGHT? I HOPE? NAH! ↓
WELL, TO TELL YOU THE TRUTH, I'M GLAD
I'M FRIENDS WITH YOU BECAUSE YOU CAN
UNDERSTAND ME, EVEN THOUGH YOU ARE
PRETTY WEIRD. YOU & M.M. &
BYANKA & . . . ??

TUNE IN FOR
NEXT YEAR'S
FRIENDS
GG DANIEL
ROB

DEAR A.M.,

So, THE YEARS FINALLY COME TO AN END AND WHEN I LOOK BACK AT THE 2 BEST FRIENDS A PERSON COULD EVER HAVE, I CAN'T BELIEVE HOW AGNORMAL AND CRAZY YOU'VE BECOME!!! NOT SO MUCH DAN BECAUSE HIS BRAIN / BUT YOU AND HAVEN'T LATELY BEEN RUNNING HIS SERIOUS PROBLEMS. I MEAN YOU HAVE SOME HOPE YOU DON'T COME BACK ANY WIERDER THAN YOU ALREADY ARE AND TELL US THAT I'M JUST SPIRIT WAS GOEN PUTTIN YOU TO SLEEP EVERY NIGHT. THOUGH (HOPEFULLY) WE'VE THAT OUR DISAGREEMENTS SUPER COOL EVEN BEEN BIANCA & I GOT THIS SUMMER AND GET FUN). I HOPE YOU SEE I'VE SOME DAY. SO HAVE A GREAT SUMMER & ROMANTIC & INTIMATE AND SHIT LIKE THAT. & JUST KNOW TOGETHER GONNA MARRY HER (BIANCA & DAN CAN GET INTO TOO MUCHO TROUBLE (ESPECIALLY W/ PYHARA) HOPEFULLY I'LL BE BACK A LITTLE MORE NORMAL THAN YOU'VE BEEN LATELY! LOVE YOU, & DAN SOMETIMES. I CAN'T WAIT TO COME BACK IN THE SUMMER, YOU WILL / IT'S JUST A PHASE! HA! LOL!

AND DON'T BE A STRANGER AND TRY TO COME BACK RECENTLY. THEM PRETTY SUMMERS ARE THE BEST WELL SEE YA LATER! BACK AT'S

Alex,
We should go out again so you can take me home. We should go out for lunch more often because Next year its open campus and it won't be as fun. Don't waste to much money on hairspray. Don't listen to Brandon because he thinks he's Joe Culo. Call me during the summer & we'll call everyone & go out

YOUR PAL (BRANDON)

Your friend
Hector Marquez
(Teen Wolf)

face is skinnier than his neck!!!

A.M. + M.M

(+ BIANCA)

(TAC) HA, HA!

PAINFULLY EVERY DAY!

ZZZZZ

You guessed it music lovers! As part of our musical theme '87, each section of the TECHMAN, including our outstanding technologies, are all named after various beloved songs, which after lengthy consideration while tap dancing on oil drums with a precarious fez on our head, we felt were appropriate for these popular sections. One suggestion as you sing on: As soon as you apprehend the title song for each section, it is ultimatley up to you to start humming the lyrics while turning the pages at the same time! The tempo is also up to you. For those who like singing in the shower, waterproof copies of this special edition are available for purchase. If several of you get together and start flipping through the pages, you can start a chorus . . . Morman Tabernacle Choir look out! If by chance you are not familiar with any of the popular songs we have chosen, simply follow the bouncing ball and give Mitch Miller a call at the toll free *I Want To Sing* Hotline number at 1-800-333-SING. Mitch or his counterpart (or is that counterpoint) Mr. Welk will be gald to instruct you in learning how to say, "And a one, and a two, and a three, etc." For now, we will stop harping on the matter, as long as you drum up enough interest to clear your throat, pick up your baton and start turning the pages on a singfully delicious book, meant exclusively for those of you who follow that song in your heart.

My dearest Alex,
What's up
Fine. You
Maybe you can give me
address so I could
her out sometime.
It's been great
having you in my english class
(Your write). I learned a lot about M.M.
Right!? I knew you were go-
ing to make it as secretary). Good
luck next year!! Well bud, take care
summer and don't done 4 me!)
much! (Gate some later dawg and
Thanks 100 (with you know) better days

Freshman Picnic '87, C'est magnifique, and along with the fun had as an added attraction an aerial performance by a group of the country's leading skydivers, Mr. Chris Wentzel and the Wings Skydiving Team. This video-taped event proved to be an exciting day as Mr. Aguanno's voice came over the loud speaker announcing to the crowd that the jump was about to begin. Looking up into the blue sky, one watched the skydiver jumping from the plane and circling downward onto the target landing spot in the center of the Tech mall. The jump was perfectly executed and the crowd was ecstatic. Afterwards, the freshmen and their parents formed various numerical formations to be photographed by the Techman helicopter along with panoramic aerial shots of the campus. We hope you enjoy these splendid photos taken at the risk of life and limb exclusively for our school.

Our yearbook theme is a musical theme which announces to the world the melodic memories we have individually and collectively put together over the past year. We title this opening section *Jump, Jump* (from the Pointer Sisters) and further illustrate our point with the skill and professional effort of the Wings skydiving team. All of us need to take that jump into life, and education and acquired knowledge are the skills we develop here at Bosco Tech to allow us to jump: To jump into our life, our faith, our careers and our relationships. Let us sing this song unto ourselves and jump into what we love.

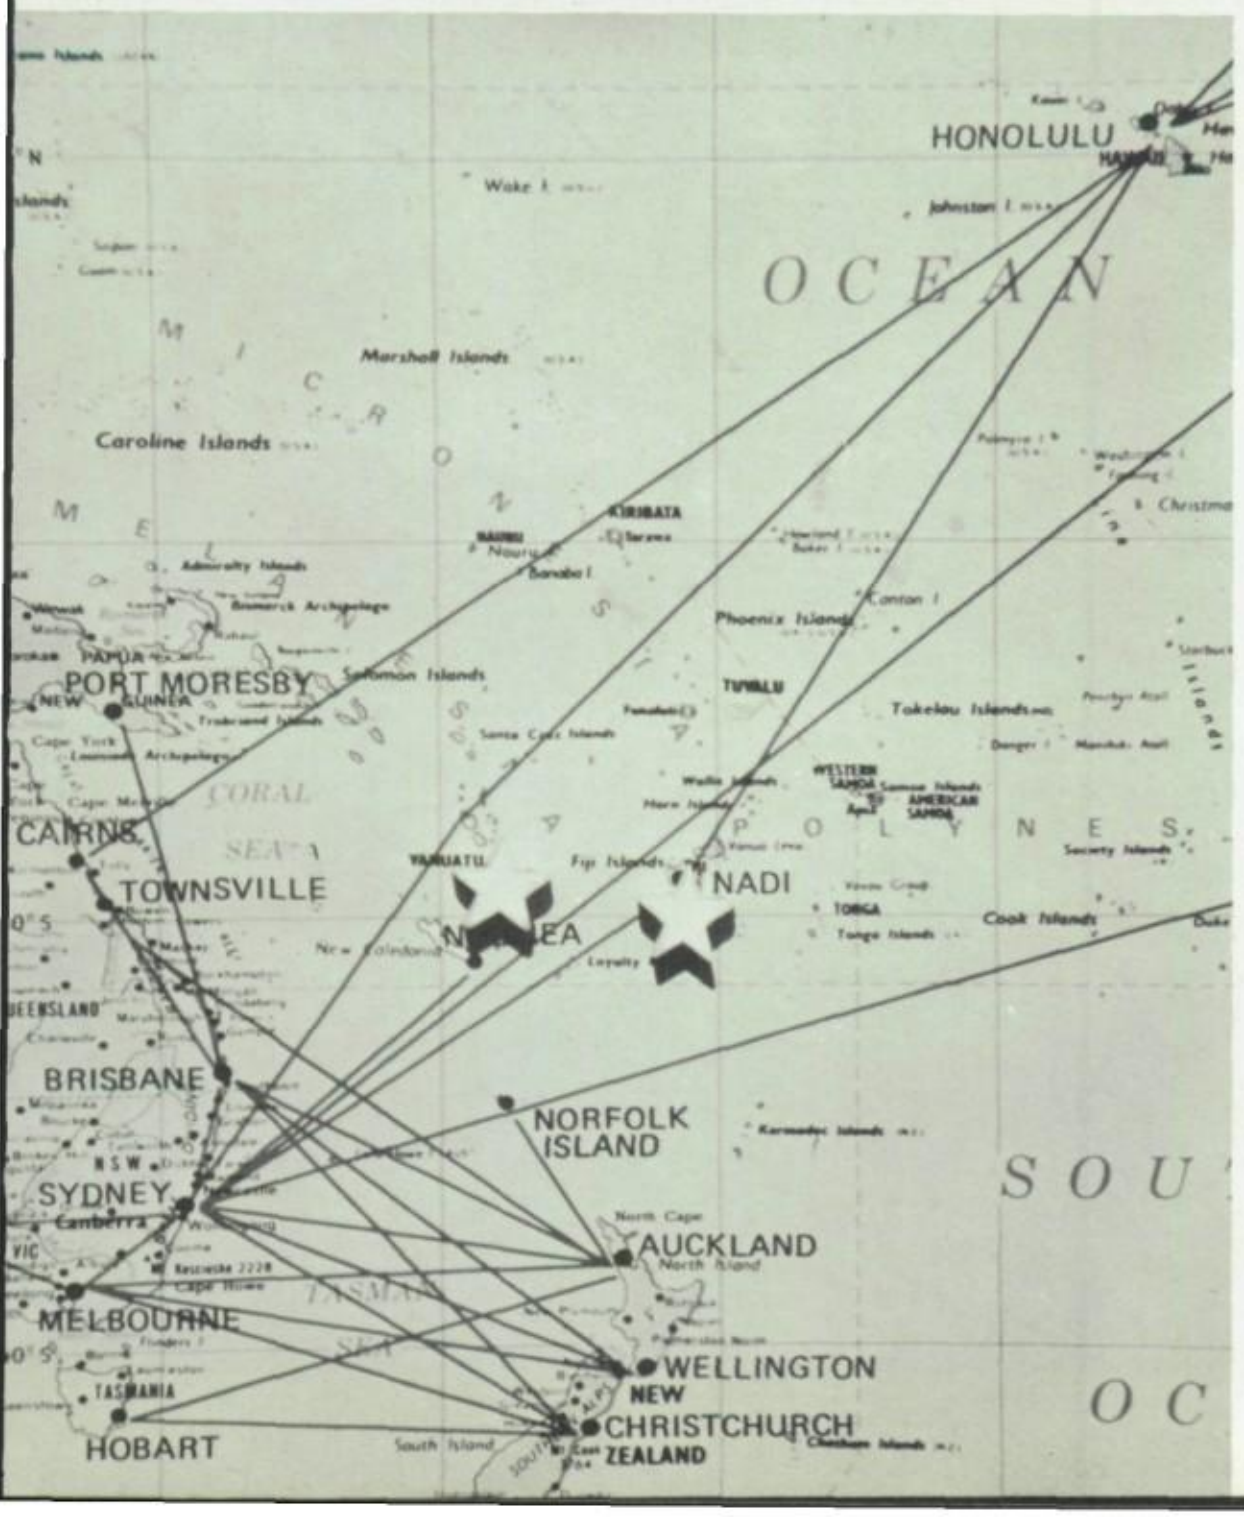
Leavin on That Midnight Train!



During Easter 1986, six families enjoyed a quiet vacation by sending their sons with Mr. Stolz on the Bosco Tech expedition to the South Pacific. Their journey began with a Qantas overnight flight to Nadi, Vita Levu, Fiji Islands (5 1/2 hours south of Hawaii) for a day's stopover. Their introduction to the Fijian native traditions was provided on an all day excursion to Pacific Harbour Cultural Centre near Suva where they especially enjoyed the war dances and the cannibalism demonstrations. Next day, an hour and a half Air Pacific flight took them to the main objective of their expedition — the newly independent (1980)island nation of Vanuatu.

Formerly called New Hebrides, Vanuatu consists of 73 islands, islets, and coral atolls 1100 miles northeast of Australia. Efate Island with the country's capital, Port Vila (population 4,000), was their base for trips to other islands. Le Lagon Hotel, located on fabulously beautiful Erakor Lagoon, provided canoes, sailboats, windsurfers, snorkeling, and a golf course. Their first adventure was to go SCUBA diving at Island Reef. Following this they stayed on tiny Hideaway Island in Mele Bay. Here their SCUBA diving continued on Hideaway Reef and Housemaid's Reef, handfeeding many varieties of multicolored tame fish and seeing many large colorful sponges in 82°+ water with 100+ foot visibility. Their first night dive produced many nocturnal sea creatures not normally seen during the day. Early next morning they went out to feed a number of reef sharks (no students used, just the previous day's leftovers). The site chosen, of course, was that of the previous night's dive. This started them wondering what might have missed seeing them on that dive.

The next three days were spent leisurely sailing on board the 75 foot auxiliary ketch Coongoola, visiting the islands off the west coast of Efate Island. These days provided plenty of pleasant experiences. A SCUBA dive of Paul's Rocks showed them a white-tipped reef shark — fortunately swimming in the opposite direction. Other dives off of Moso Island produced underwater caverns, gorgonia fans, black coral, and beautiful multicolored coral gardens. Other memorable sailing experiences were the insects at a night barbeque on a deserted island beach, finding a sea snake in a downed U.S. World War II Corsair fighter, breaking the outboard motor propeller on the Coongoola's dinghy while miles from the ship (students had to stand up and act as sails as others rowed), visiting a giant ancient burial cave (Files Cave) on Lelapa Island, and the kava ceremony and feast put on for them by the entire Siviri Village (roast pig, lap-lap, taro, paw-paw, and other exotic foods).

Their sailing adventures were topped by their flight on an Air Melanesiae small plane to Tanna Island, the home of the Jon Frum cargo cult. Here Americans are looked upon as gods by the practitioners of that primitive religion. Hundreds gathered to welcome the Bosco group when they heard that Americans were coming. A village put on strange dances in their honor (and sold them souvenirs for American dollars which they [and the students] worship). At night they climbed to the edge of the crater of active Yasur Volcano which periodically rumbled and shot sparks of hot ash and rocks into the air at them.

For the final leg of this expedition, they returned to Fiji, took a Turtle Airways seaplane flight to Mana Island and relaxed at a beach resort for two days. On their Qantas flight home, they crossed the International Date Line again, and as a result, their week had two Mondays and two Tuesdays. This was a fitting conclusion to a trip which had double the fun and double the adventure most people experience in a lifetime.

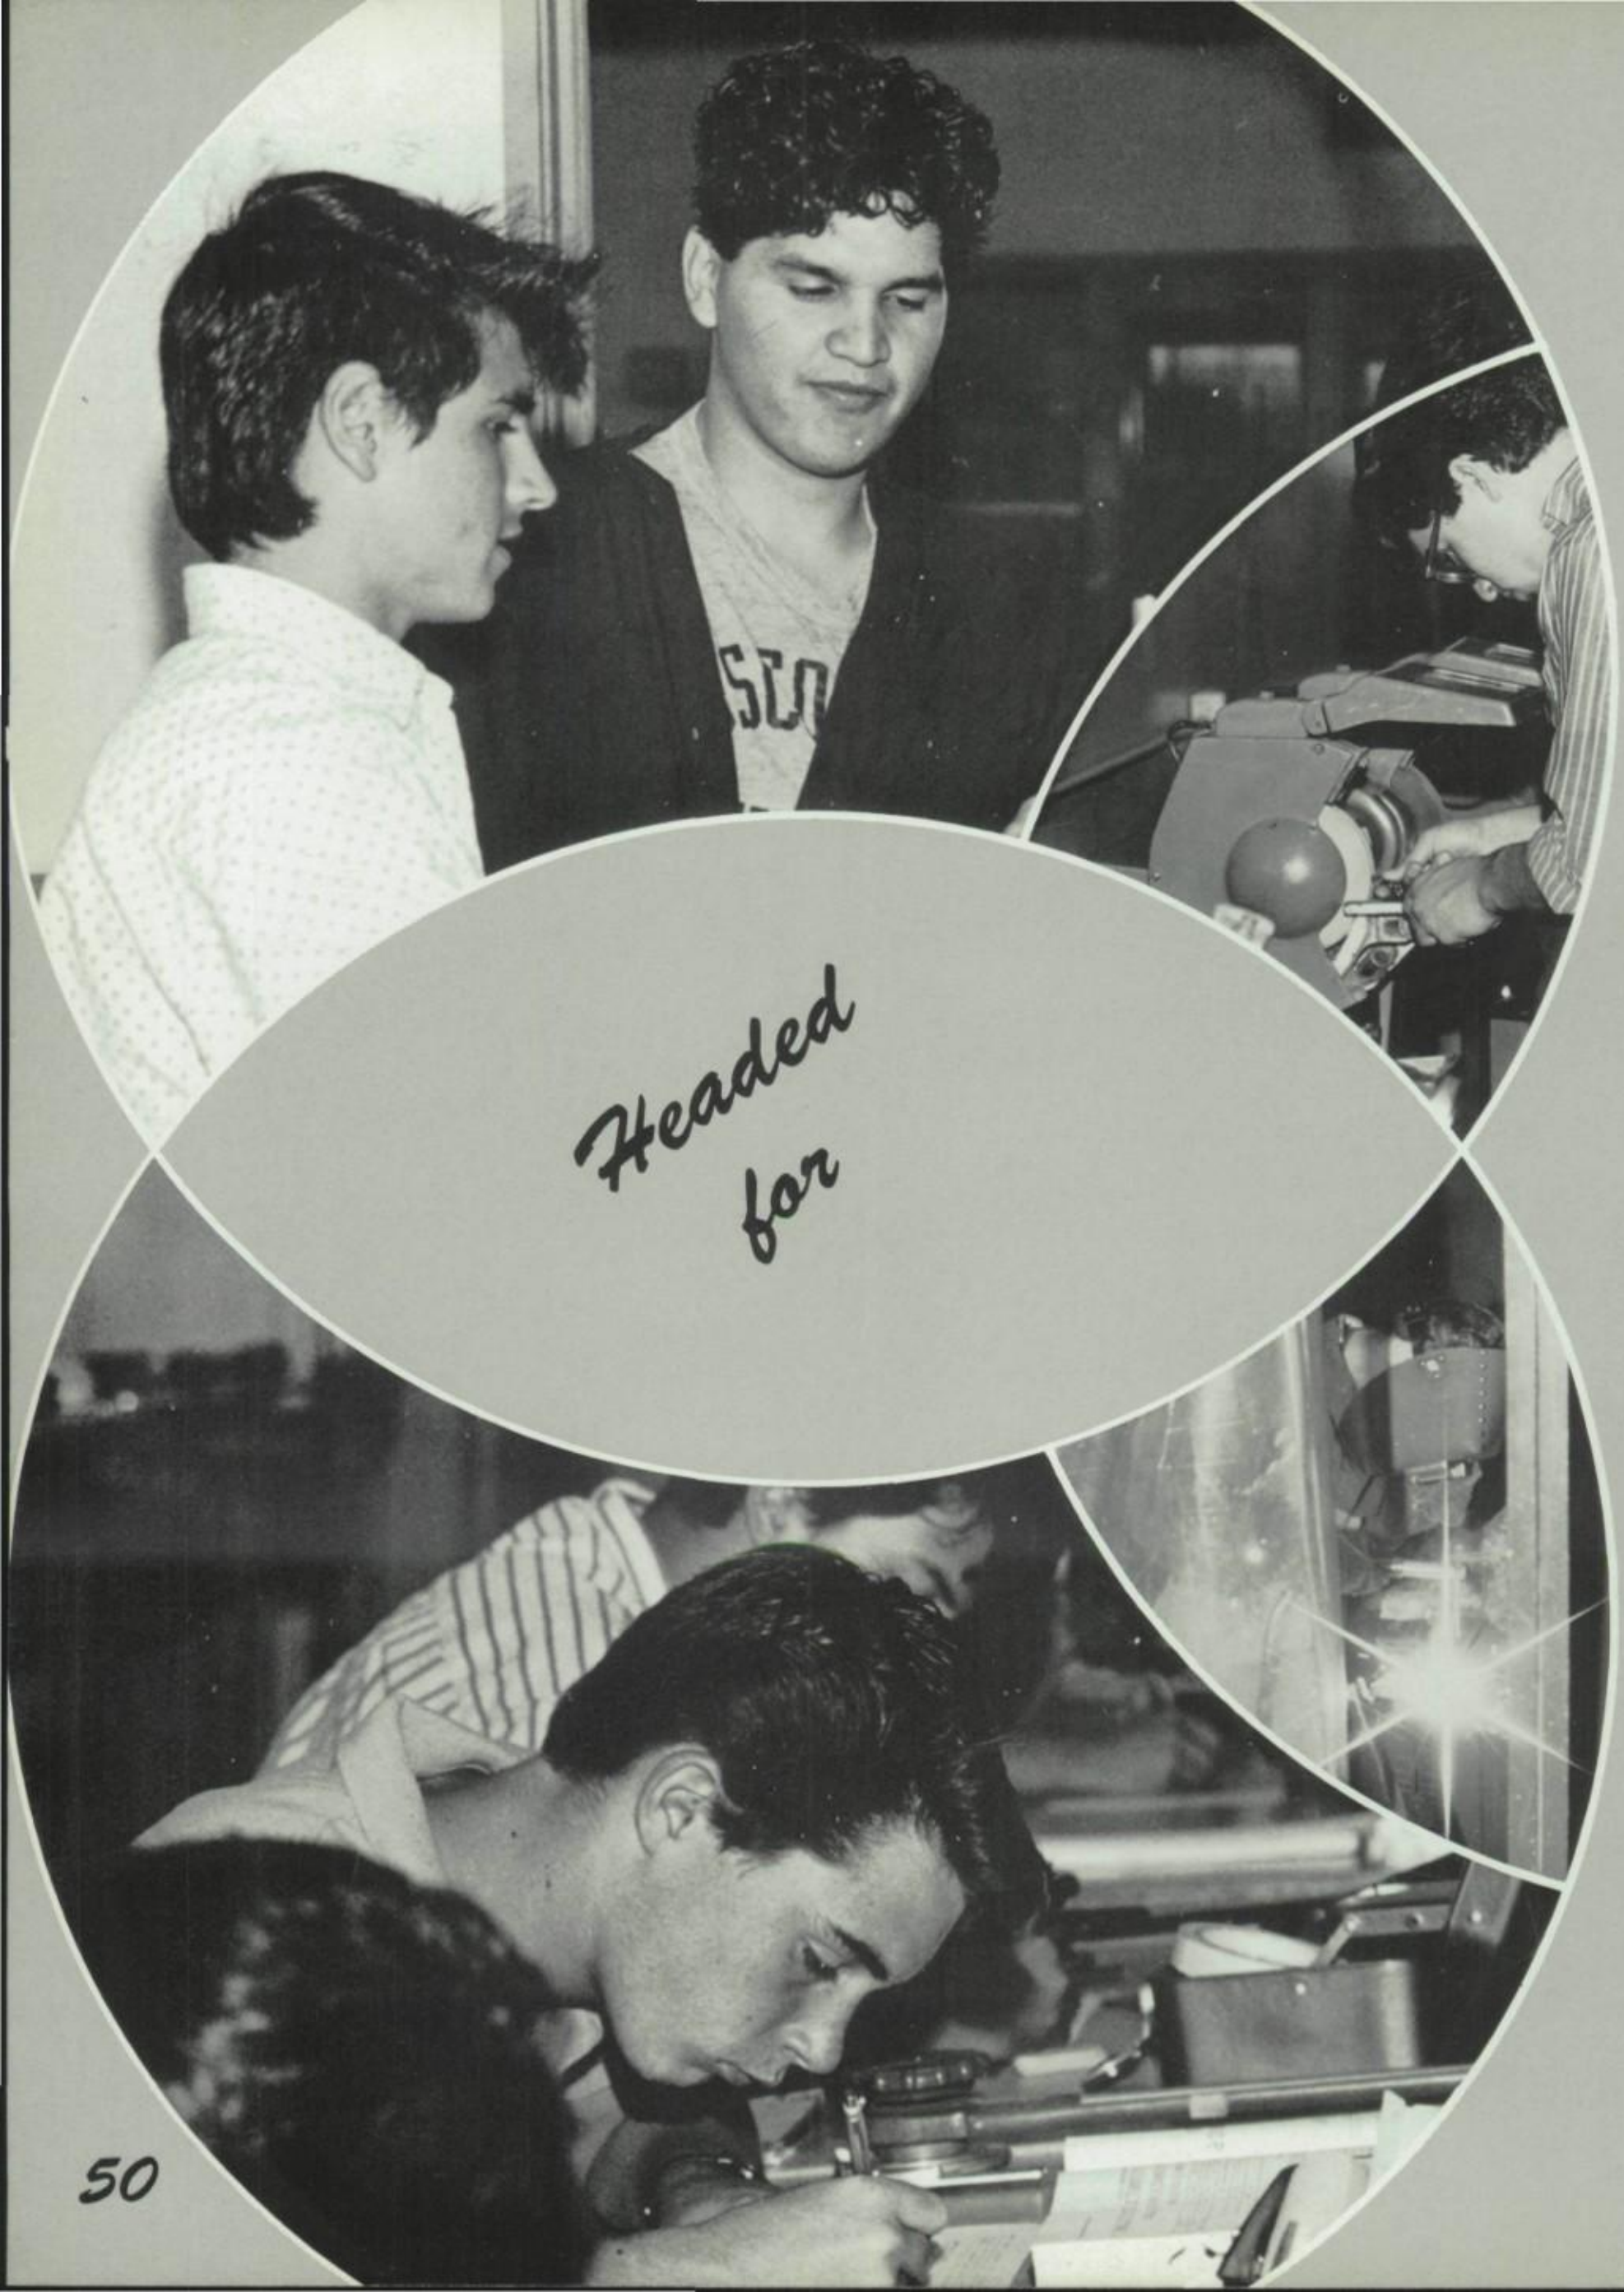
Fifth year students whose pictures were not available at this time, are given mention on the Late Arrivals page.

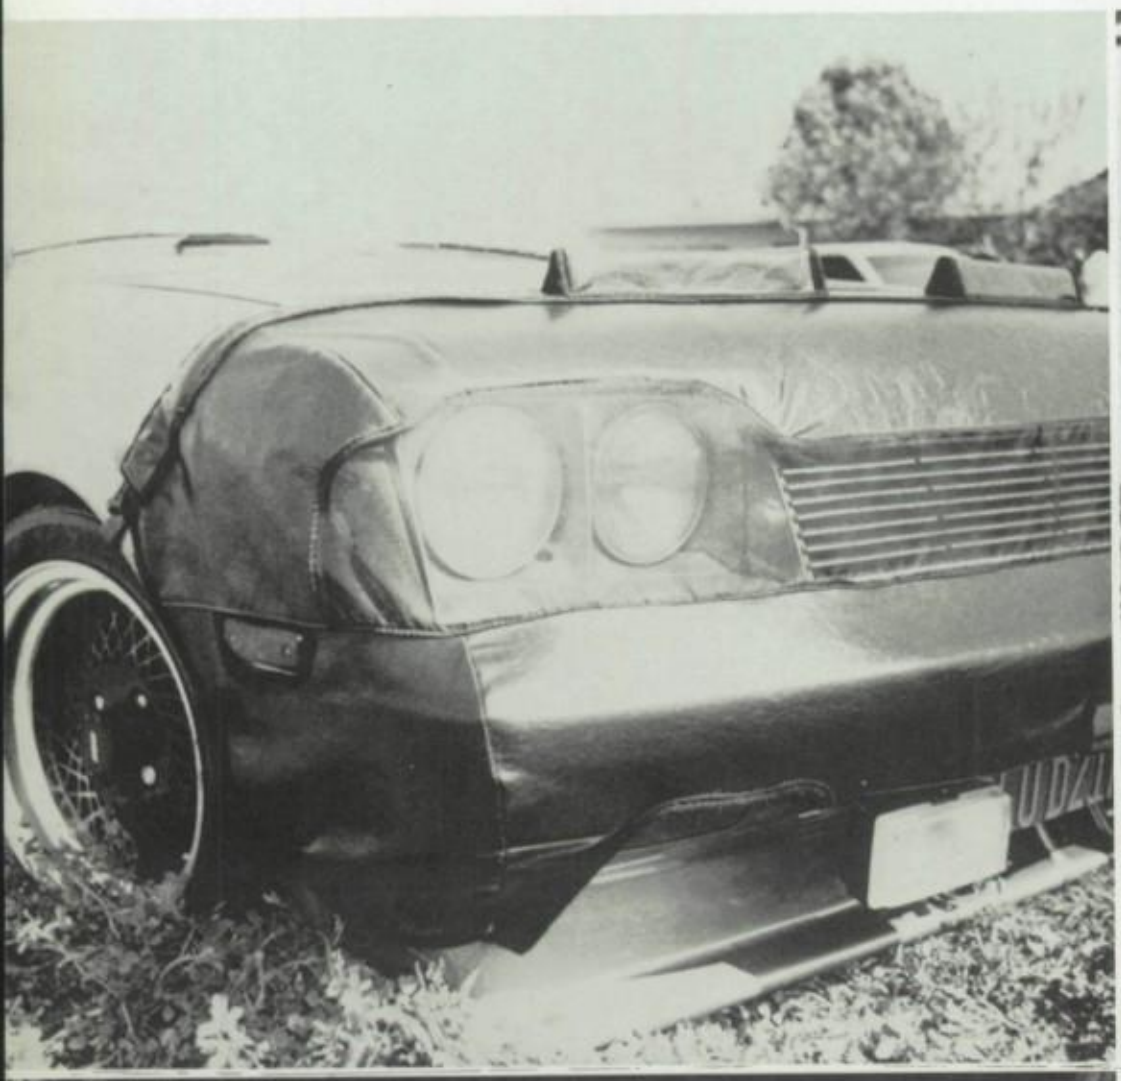
I believe the children are our future
Teach them well
And let them lead the way
Show them all the beauty
They possess inside
Give them a sense of pride
To make it easier
Let the children's laughter
Remind us how we used to be.
— from The Greatest Love of All
as recorded by Miss Whitney Houston

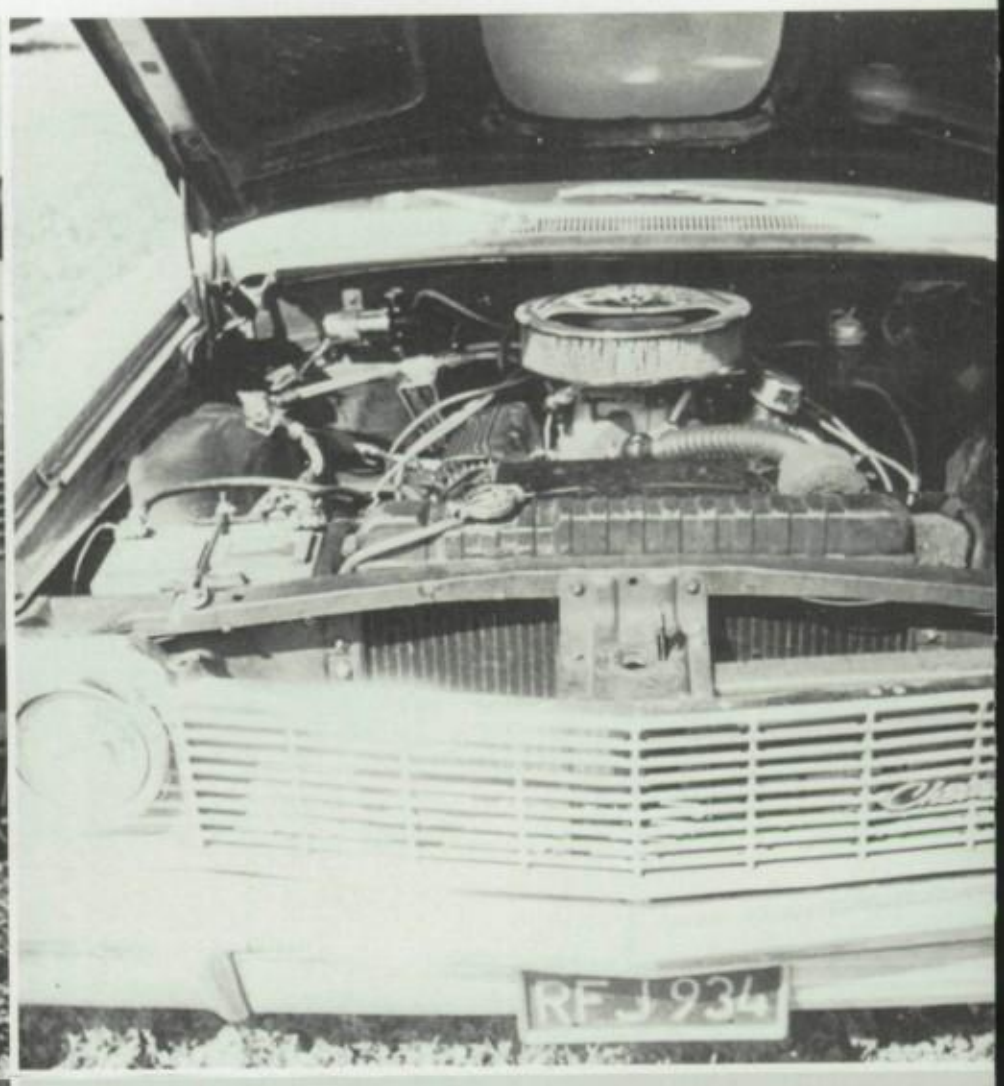


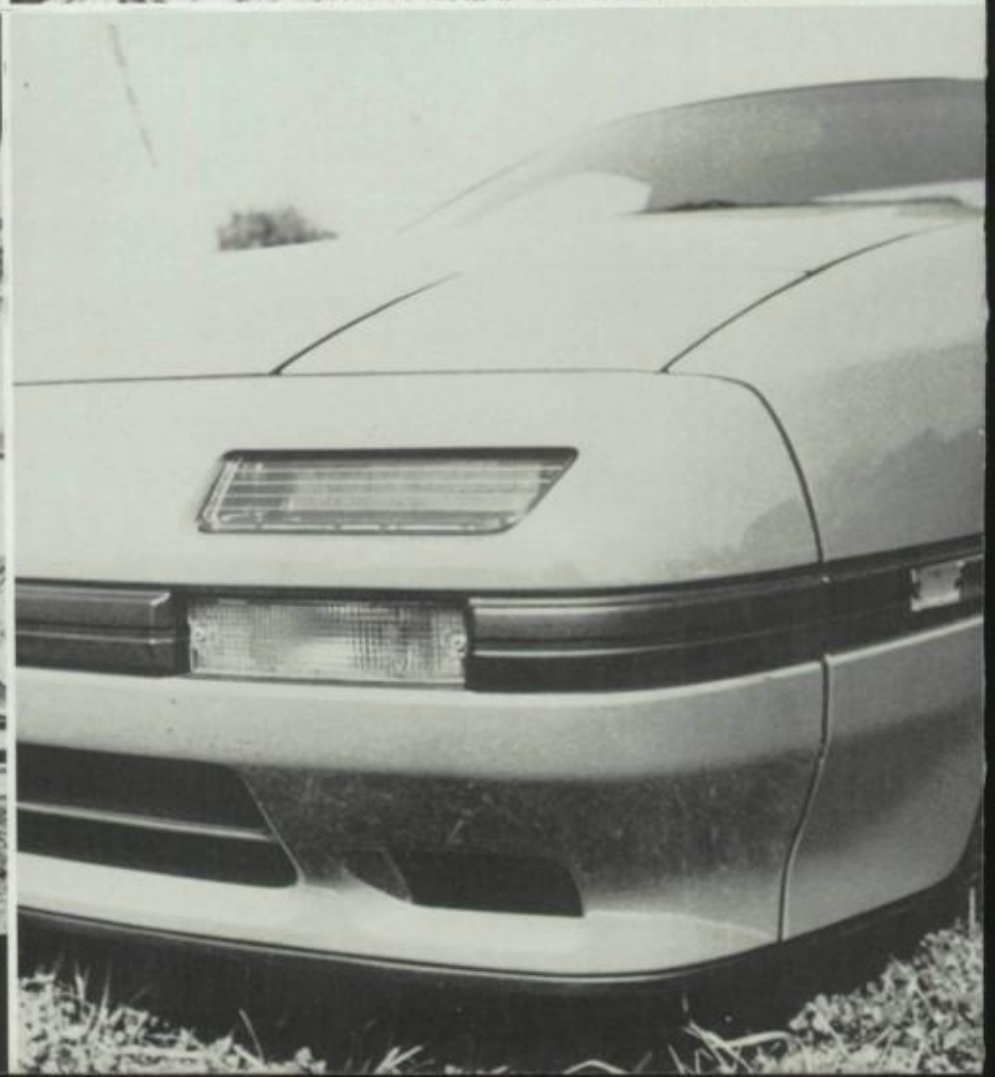
Headed for

the Future

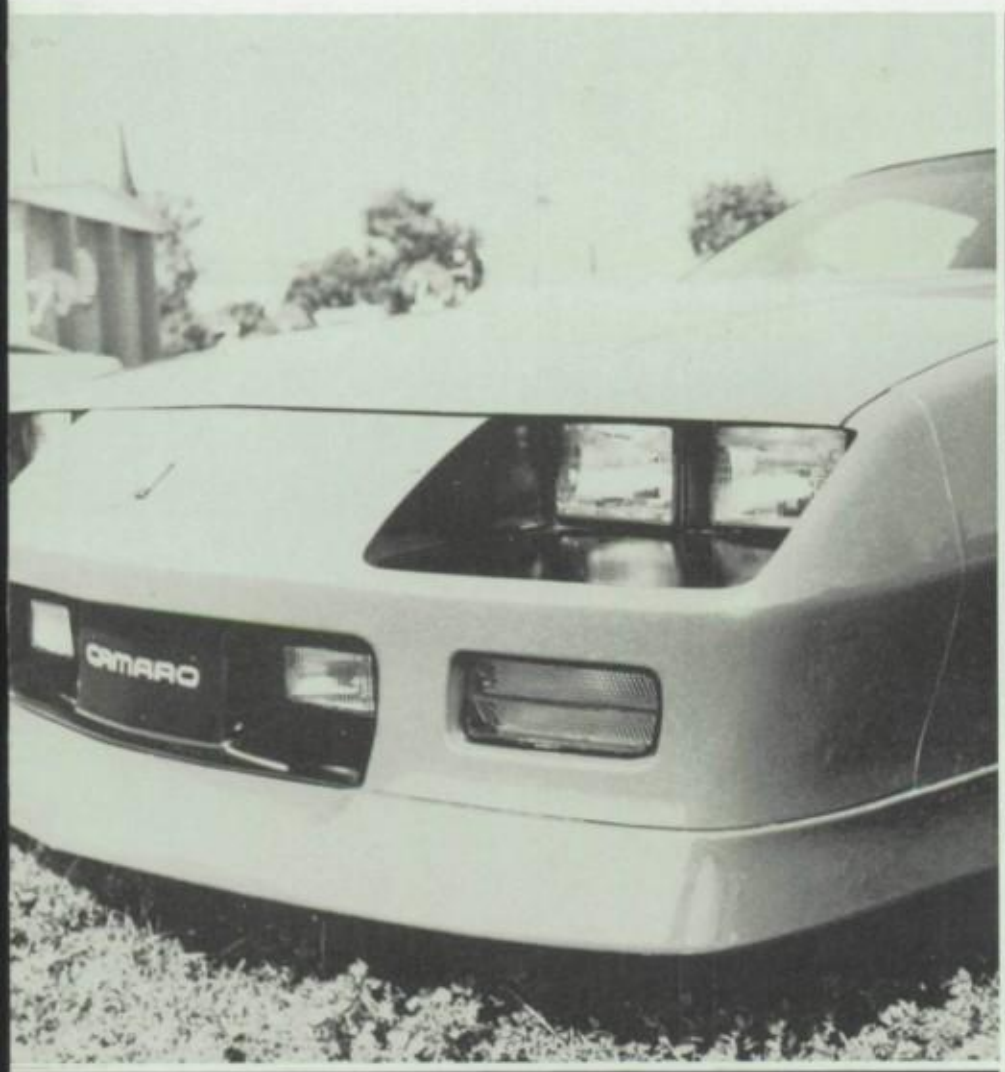
Holding Back

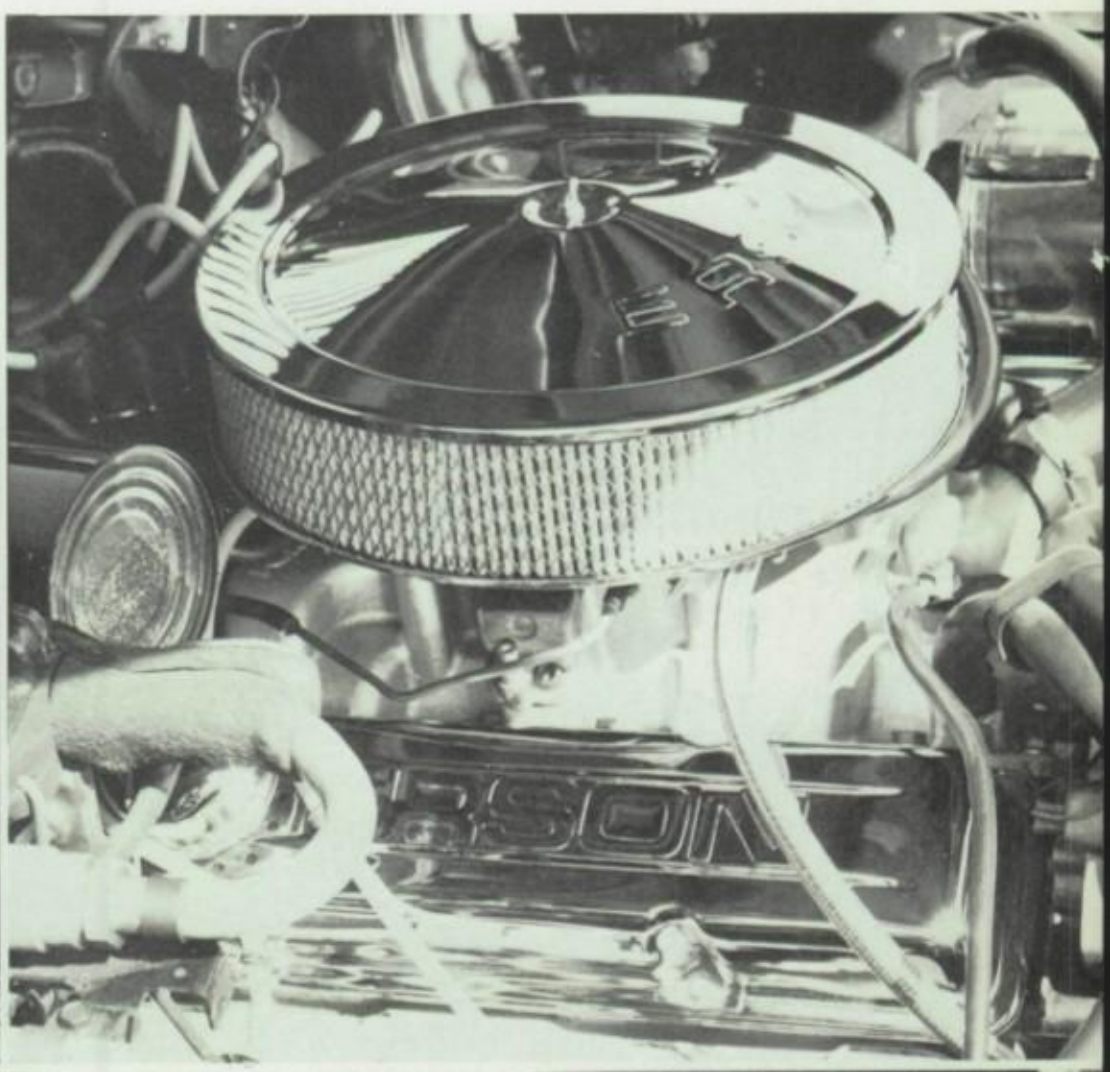


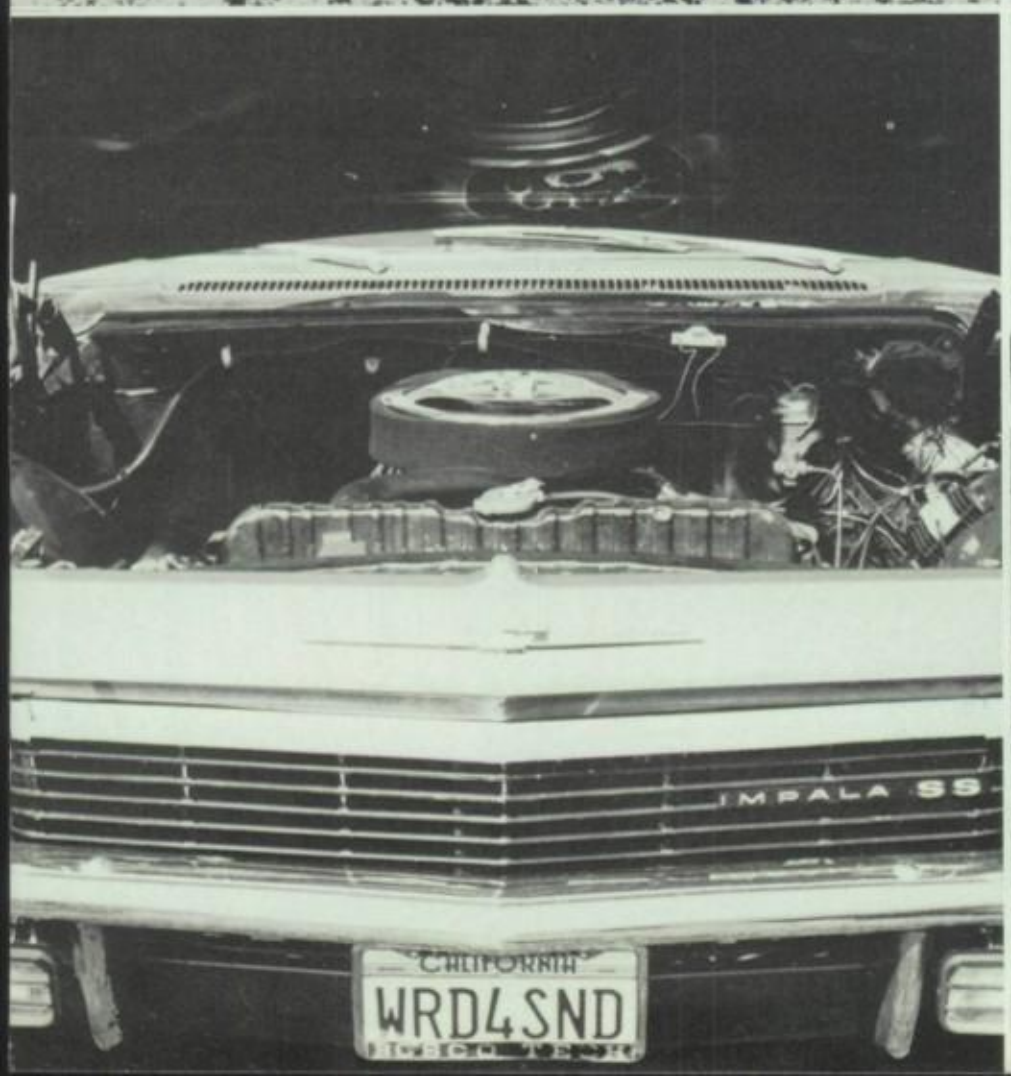




The Gears







"Because the industry changes so rapidly, we're always trying to keep up with the latest developments," explained chairman Bob Sullivan about the Automotive Department and its full-time instructors.

To this end, Mr. Sullivan attended two automotive courses offered by Ford Motor Company through the Los Angeles Unified School District. Twice a month he attended classes on electronic engines and electronic brake systems. "As it turned out, the classes were taught by John Magana, a former automotive instructor at the Tech," Sullivan pointed out.

Mr. Niranian Dass, who worked with 1st year students in the department, attended a similar series of state-of-the art courses.

Among recent innovations in the Automotive Department was the acquisition of an exhaust gas analyzer that meets 1985 California standards. The department received three new vehicles — a Nissan 200-ZX Turbo, a Nissan Stanza, and Mercury Sable — instructional use by automotive students.

"We're trying to make key acquisitions and create a more 'high-tech' program," explained Mr. Ronald Kato, 1st and 3rd year instructor. "We're also trying to make broader contacts in the field. We actively seek the advice of our alumni, especially those on our technical advisory board. We've found that some of the things we've been teaching aren't done in the industry anymore."

To update its image and to attract more students, newly-christened Construction Technology redefined its objectives and revamped its curriculum.

"The name change (from Building Technology) is designed to point out that the program will now provide our students with a more rounded introduction to the construction industry," explained new department chair Dick Livernois. "We cover not only residential construction as in the past, but also industrial and light commercial construction."

In place of the single A.S. degree in building technology previously granted, the department now offers its students a degree in one of the following specialties: general construction, electricity, mechanical plumbing, design and estimating, and construction management.

After two and a half years of instruction in a basic construction technology curriculum, the students take an additional two and a half years in their specialty.

The overall program is also designed to acquaint the student with other aspects of the construction industry besides physical labor. Nine new business courses have been added, covering such topics as management techniques, accounting, law, and financing as they relate to the construction industry. This business sequence is available to 4th and 5th year students in the technology.

Although participation in Construction Technology's cooperatiave education program formerly was mandatory, upperdivision students now have a choice of whether to participate.

"Some students may choose that route to get a taste of a real construction site," explained Garrett Terrones, a 5th year student-instructor in the program. "Now, however, students can enter a co-op ed program to learn more about management and finance, for example." Whatever the case, students can now do their co-op ed in the summer between their 4th and 5th years.

Sing to Yahweh, sing to the music of harps;
and to the sound of many instruments;
to the sound of trumpet and horn
acclaim Yahweh the King!

Let the sea thunder and all that it holds,
and the world, with all who live in it;
let all the rivers clap their hands
and the mountains shout for joy,
at the presence of Yahweh, for he comes
to judge the earth,
to judge the world with righteousness
and the nations with strict justice

Psalm 98

With the acquisition of a dozen new computers, the Drafting and Design Department is able to place its students at the cutting edge of their technology's computer applications.

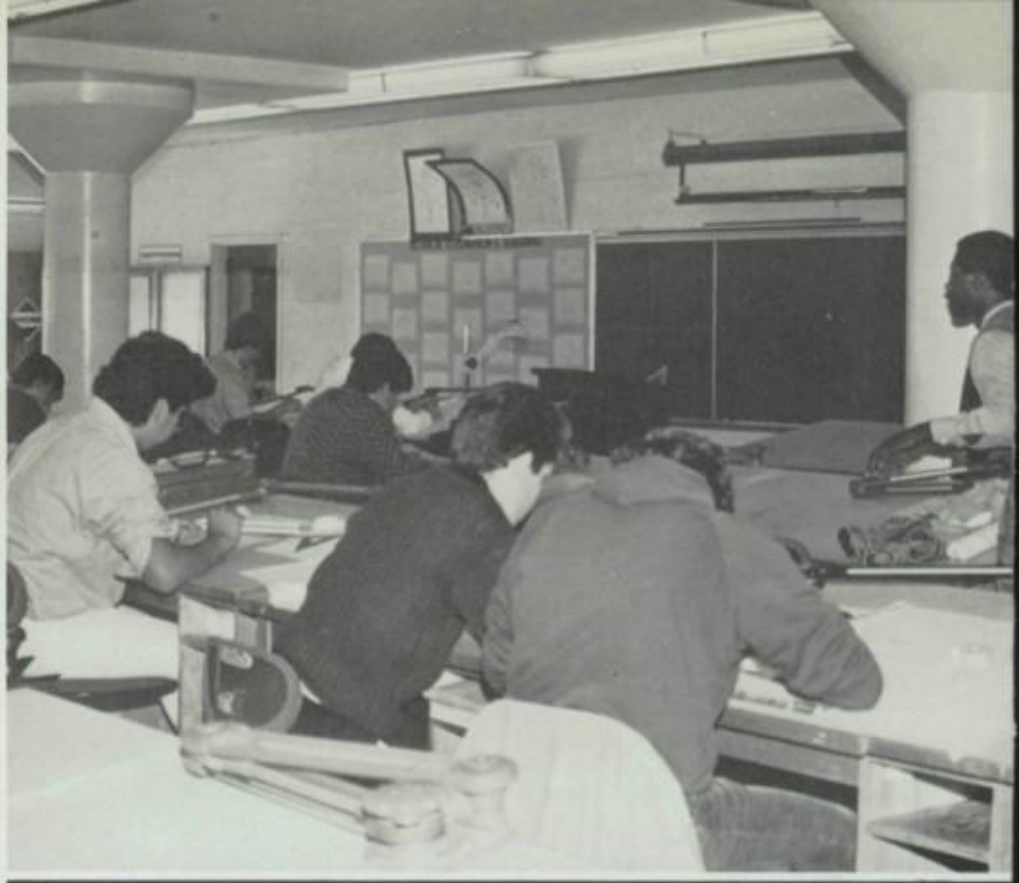
The computers, purchased from the department's share of a $142,300 grant from the Weingart Foundation, will allow the department to offer its 4th Year students a program in computer-aided drafting and design (CADD).

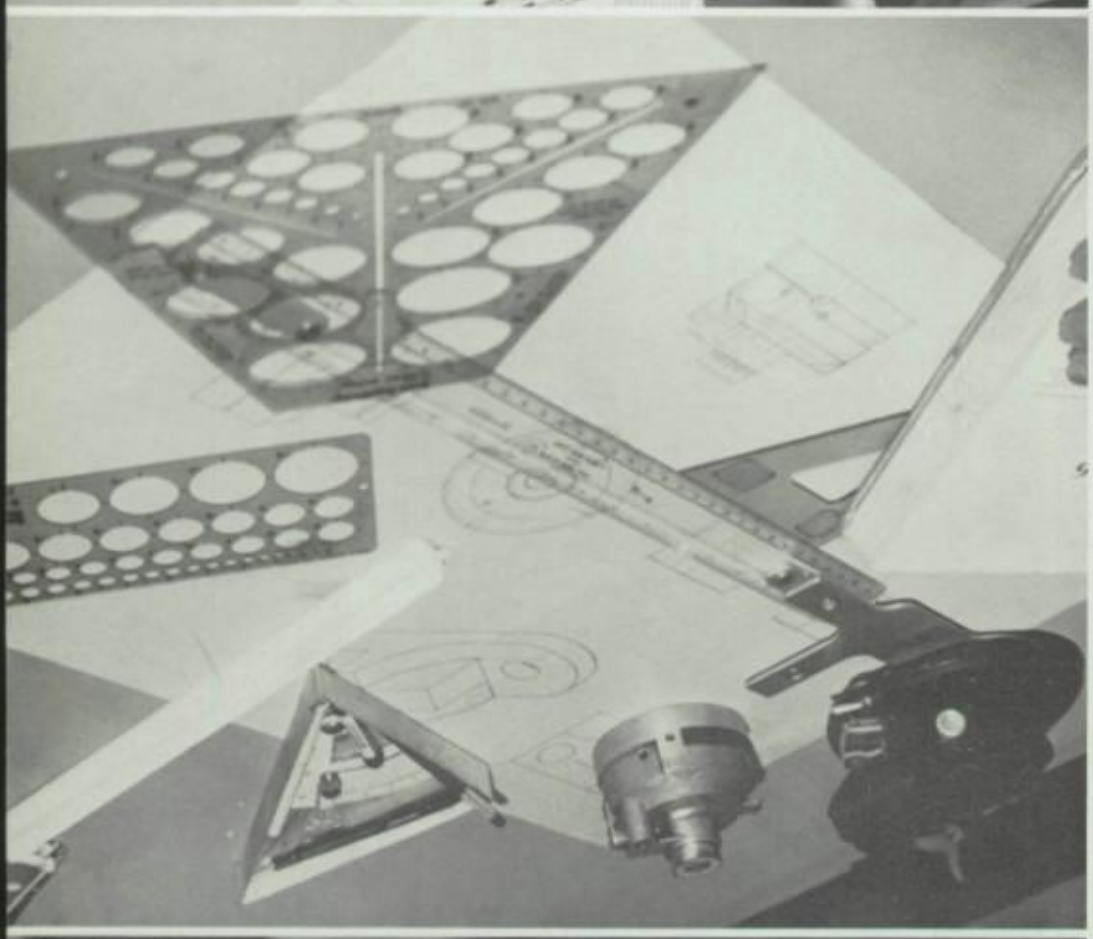
To accommodate its new equipment, the Drafting and Design Department undertook a minor remodeling of its facilities this year. The dozen IBM compatible computers were set up at 12 stations, each designed to allow two students access to the computer at once.

"CADD [computer-aided drafting] is just a tool to allow the student to depict on the screen what he's trying to duplicate for manufacturing purposes," explained Mr. Jack Mauterer, former chairman of the department. "A student must still understand and be able to use the principles of drafting. The computer basically cuts down on drawing time."

The new acquisitions supplement the CADD computers and coursework which the department has provided its 5th Year students since 1982.

LOUIS D. ARMSTRONG





Melodic Congratulations

to the

Class

of

1987

LOS ANGELES
PHILHARMONIC
ASSOCIATION

December 15, 1986

Mr. Bob Bernoskie
Don Bosco Technical Institute
1151 San Gabriel Boulevard
Rosemead, California 91770

Dear Mr. Bernoskie:

The Los Angeles Philharmonic Association and the Hollywood Bowl would like to take this opportunity to congratulate the Class of 1987 at Don Bosco Technical Institute.

May all your future years be filled with music!

Yours sincerely,

Patton S. Moore,
Superintendent of Operations,
Hollywood Bowl

JJ

At the beginning of September, the Electronics Department began the fourth year of a major expansion program that has doubled the number of electronics students to approximately 300, a quarter of the Bosco Tech student body.

The latest class level to reach a doubling of its student enrollment was the 4th year, now at a peak of 60 students. Next September the enrollment in the 5th Year will reflect the doubling of the past school year. Even without the expansion, the 1986-87 5th Year class was the largest in six years.

To accommodate the increased class sizes in the Electronics Department, since 1982 Bosco Tech has spent $180,000 on extensive renovation of the electronics lab facilities and an additional $330,000 on a variety of new oscilloscopes, function generators, and power supplies.

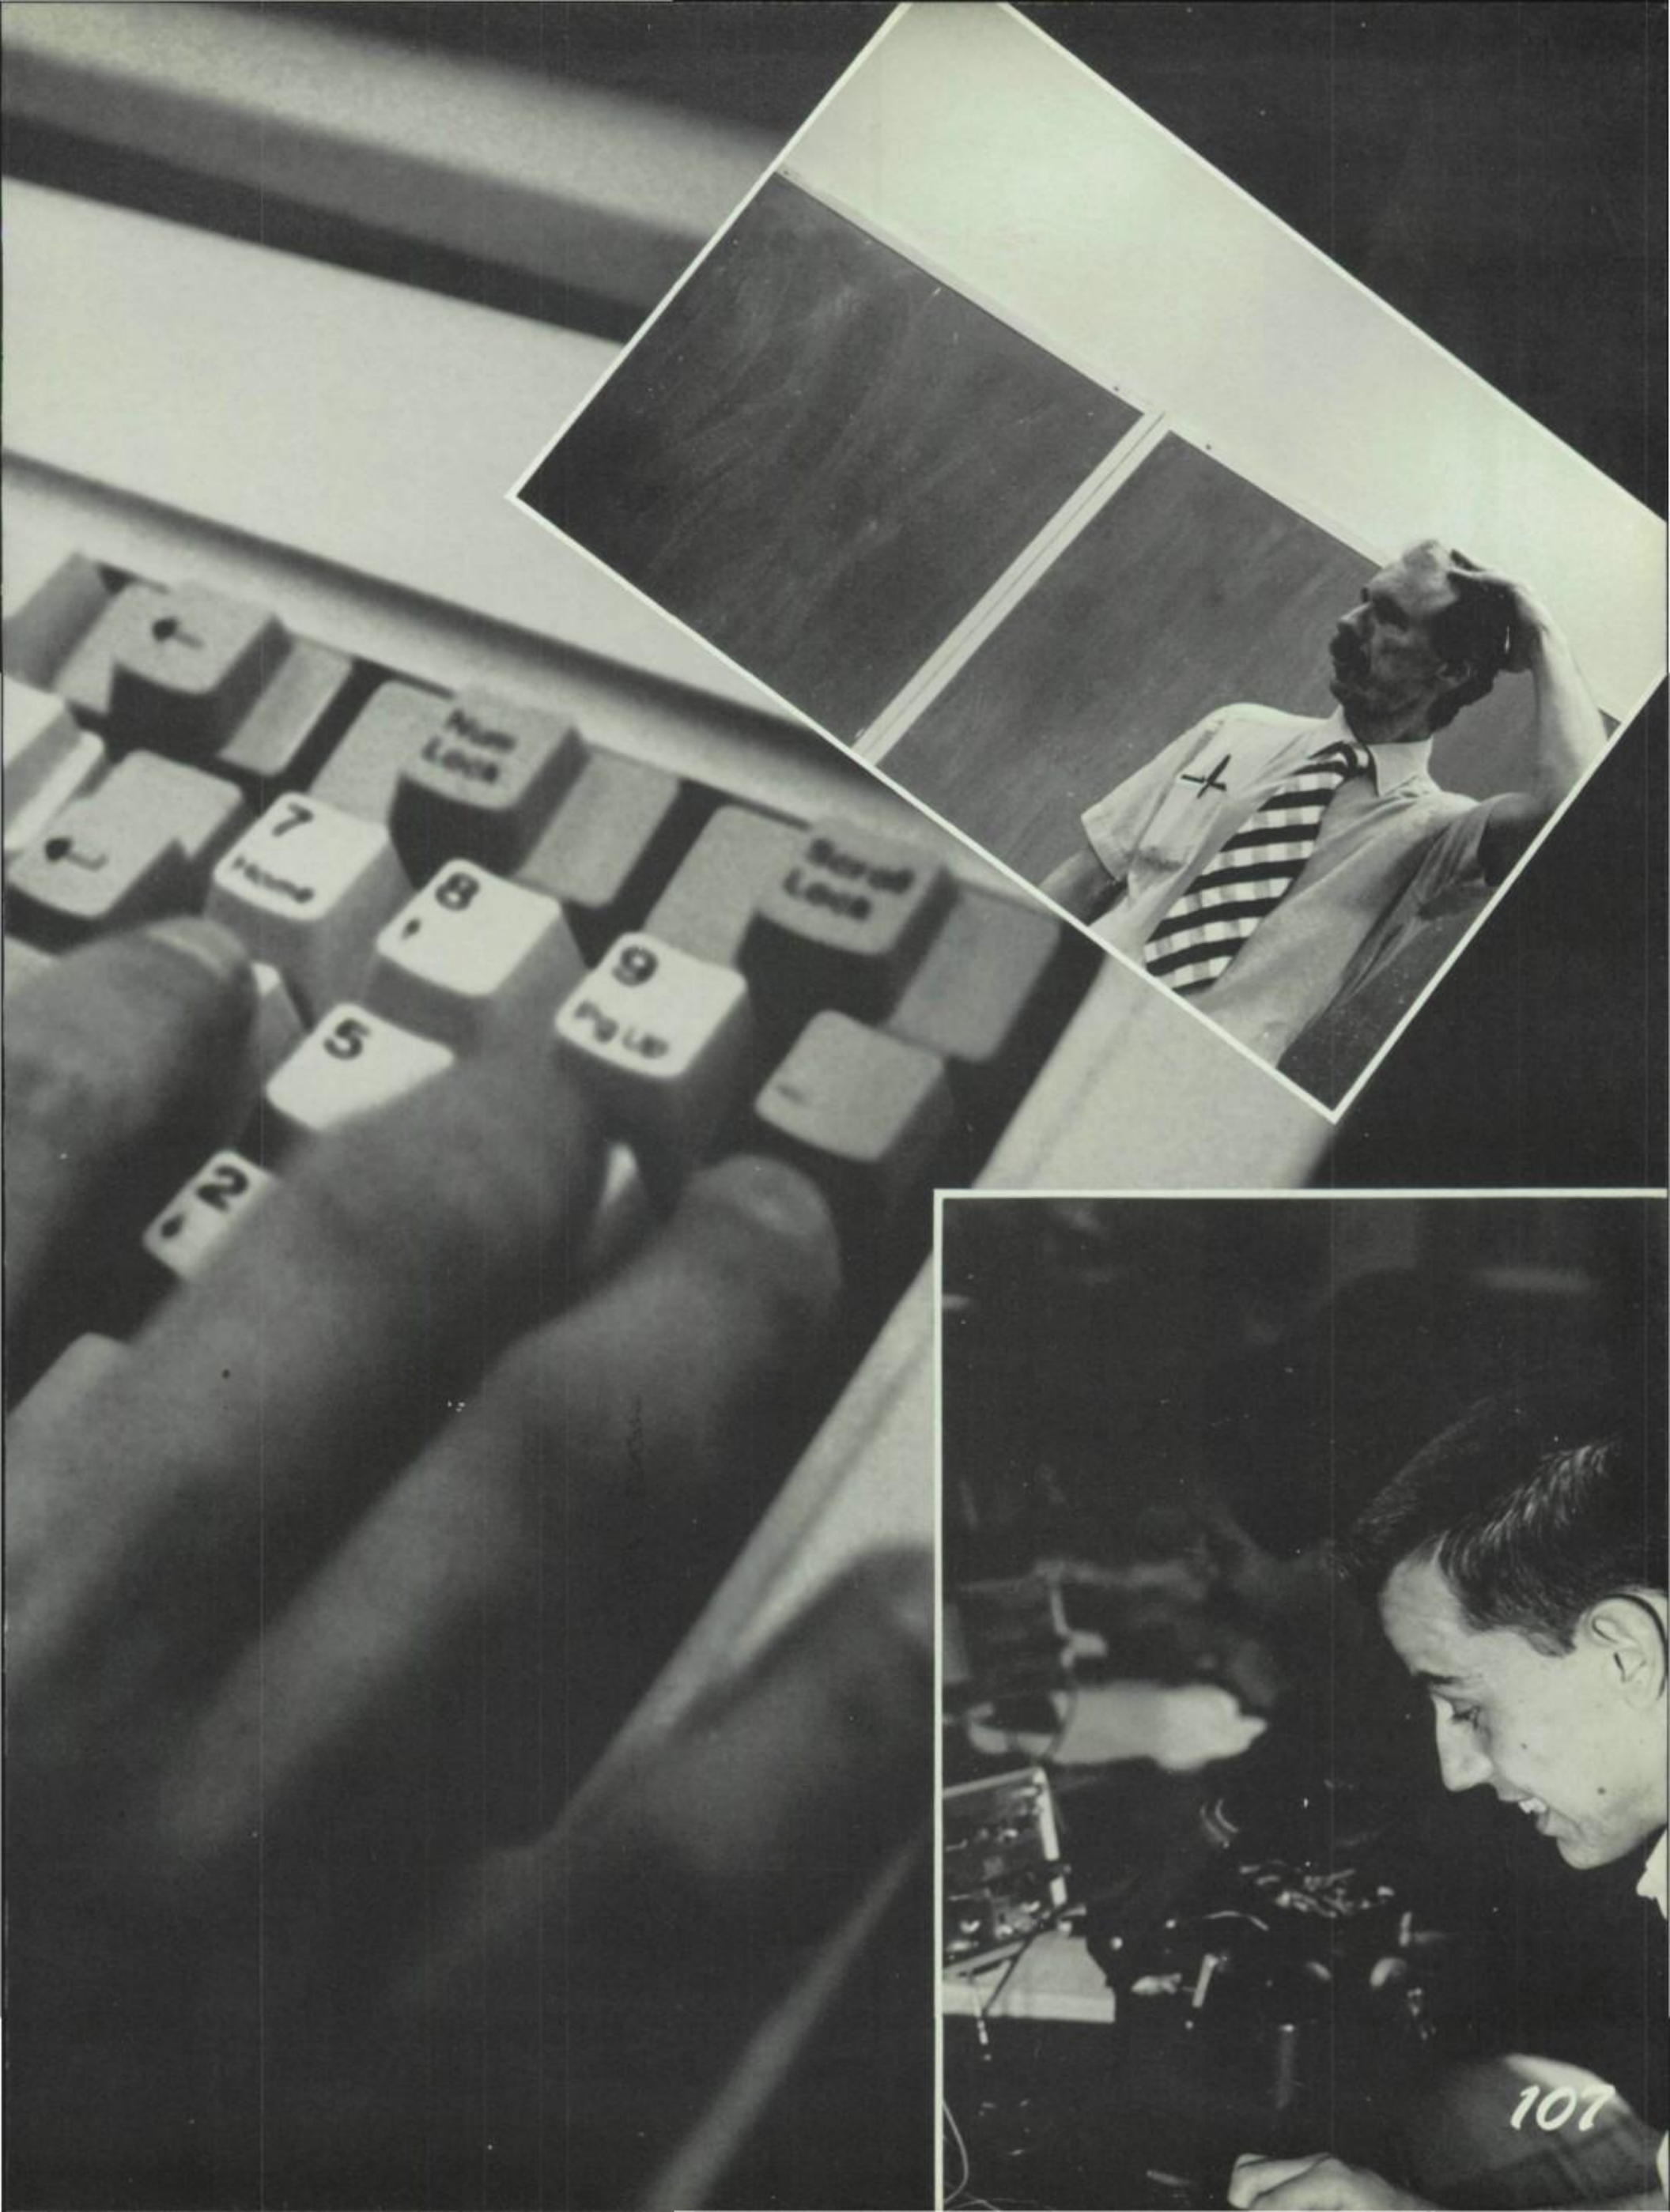
"We've also instituted a management course for 5th Year students," explained department chair John Zitzelberger. "It allows the 5th Year students to supervise a computer systems project with the 4th Year class, and it lets the 4th Year see how a management team works."

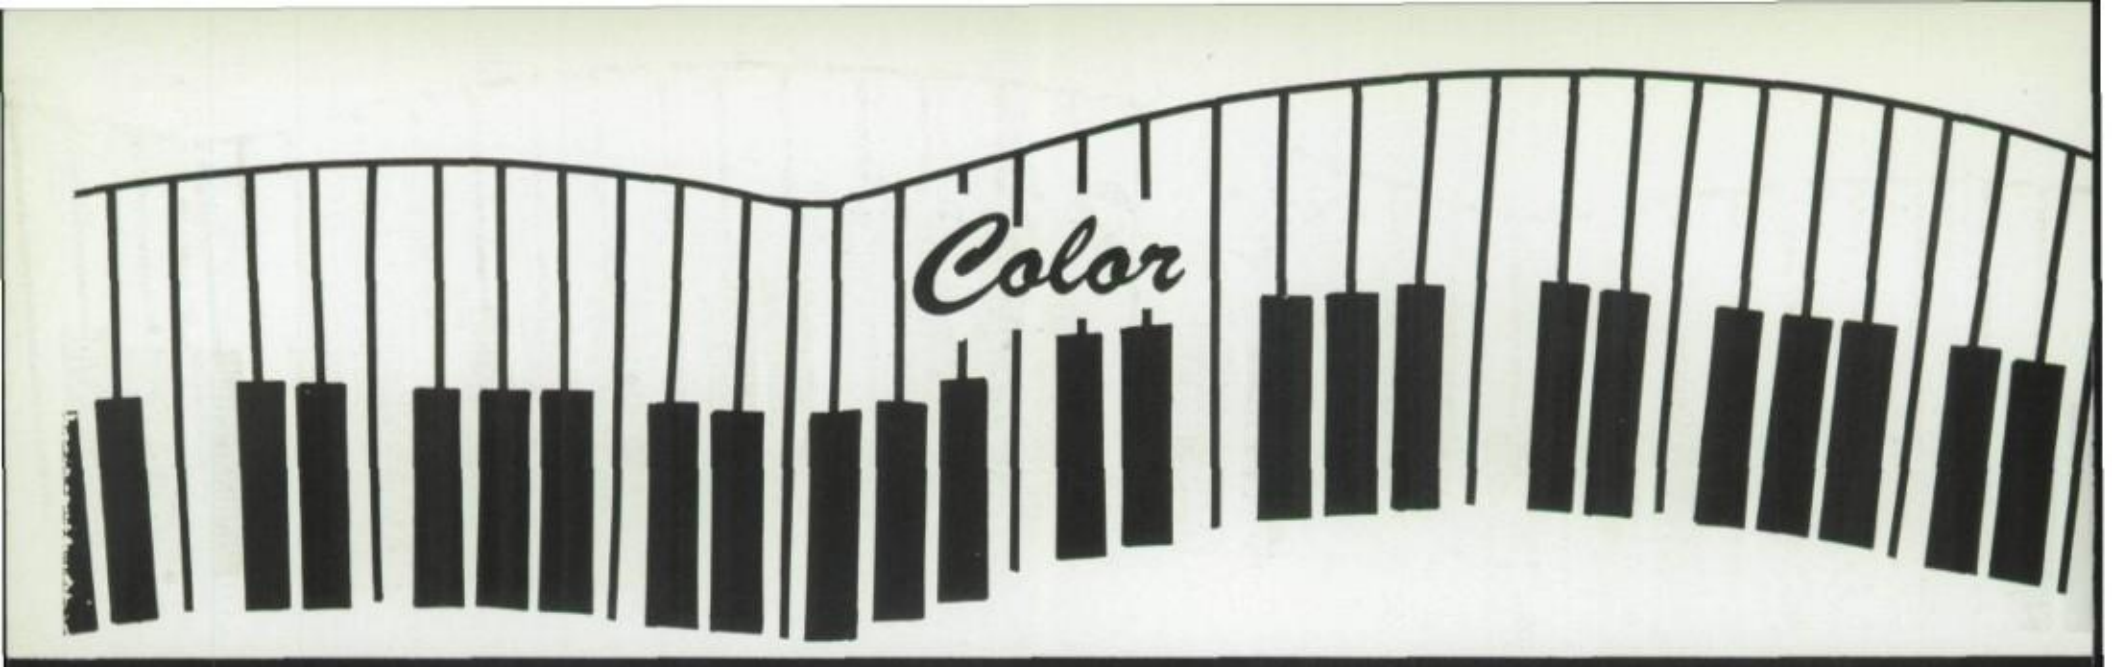
In addition, Brother Gene Mylan returned to the department last September as a 2nd Year instructor, while Jack Whitney joined the electronics staff to instruct 4th and 5th Year students.

Besides handling their teaching duties at the Tech, Brother Gene and Brother Joe Kazimir attended classes at DeVry Institute in City of Industry. Both instructors are working toward a Bachelor's Degree in Electrical Engineering.

At the beginning of the school year, two younger instructors completed their Bachelor's Degree at Cal Poly, Pomona — Mr. Al Larona in Electrical and Electronics Engineering, and Mr. David Lepe in Electrical and Computer Engineering.

Brother John Rasor, meanwhile, the other member of the department, holds a Bachelor's Degree in Physics and a Master's Degree in Electronics and Computer Engineering from Cal Poly, Pomona.





by Anthony Martinez GC '87

Since January 1986, the Graphic Communications Department at Don Bosco Technical Institute has received donations from several graphic arts firms and individuals.

Equipment donated include a Brown horizontal process camera, an Olix electronic light integrator, and an Enco automatic plate processor. In addition, supplies and funds to be used for the operation of the department were also given.

Because of constant change in state-of-the art equipment, the department relies heavily upon the printing industry for new or used equipment to insure that students receive the most valuable education possible.

Noticing the industry's growing concern about education of prospective employees, Jerry Waite, chairman of the Graphic Communications Department, states, "The industry has proven its interest in education by increasing its support for the school during recent years."

Companies donating equipment this year were the Olec Corporation of Costa Mesa, Monarch Litho of City of Commerce, Eastman Kodak Company of Whittier and Lith-O-Roll of El Monte. Materials and supplies were donated by Hurst Graphics of Los Angeles, Film Craft of Alhambra and the 3M Company of Los Angeles. Additional funding was supplied by Allied Graphics, Inc. of Buena Park, Enco Printing Products of North Hollywood, Monarch Litho of City of Commerce, Ray Prochnow, Jr. of Encino, Reliable Electric Company of Los Angeles, The Dot Printer, Inc. of Irvine, Mrs. Bess Waite of Santa Fe Springs, Ivy Hill Litho of Los Angeles, George Rice and Sons of Los Angeles, and Mr. and Mrs. John McDonough of Yucca Valley.

PREPARATION LAB

STEVIE WONDER

My heart is ready, God
..I mean to sing and play.
Awake, my muse,
awake, lyre and harp,
I mean to wake the Dawn!

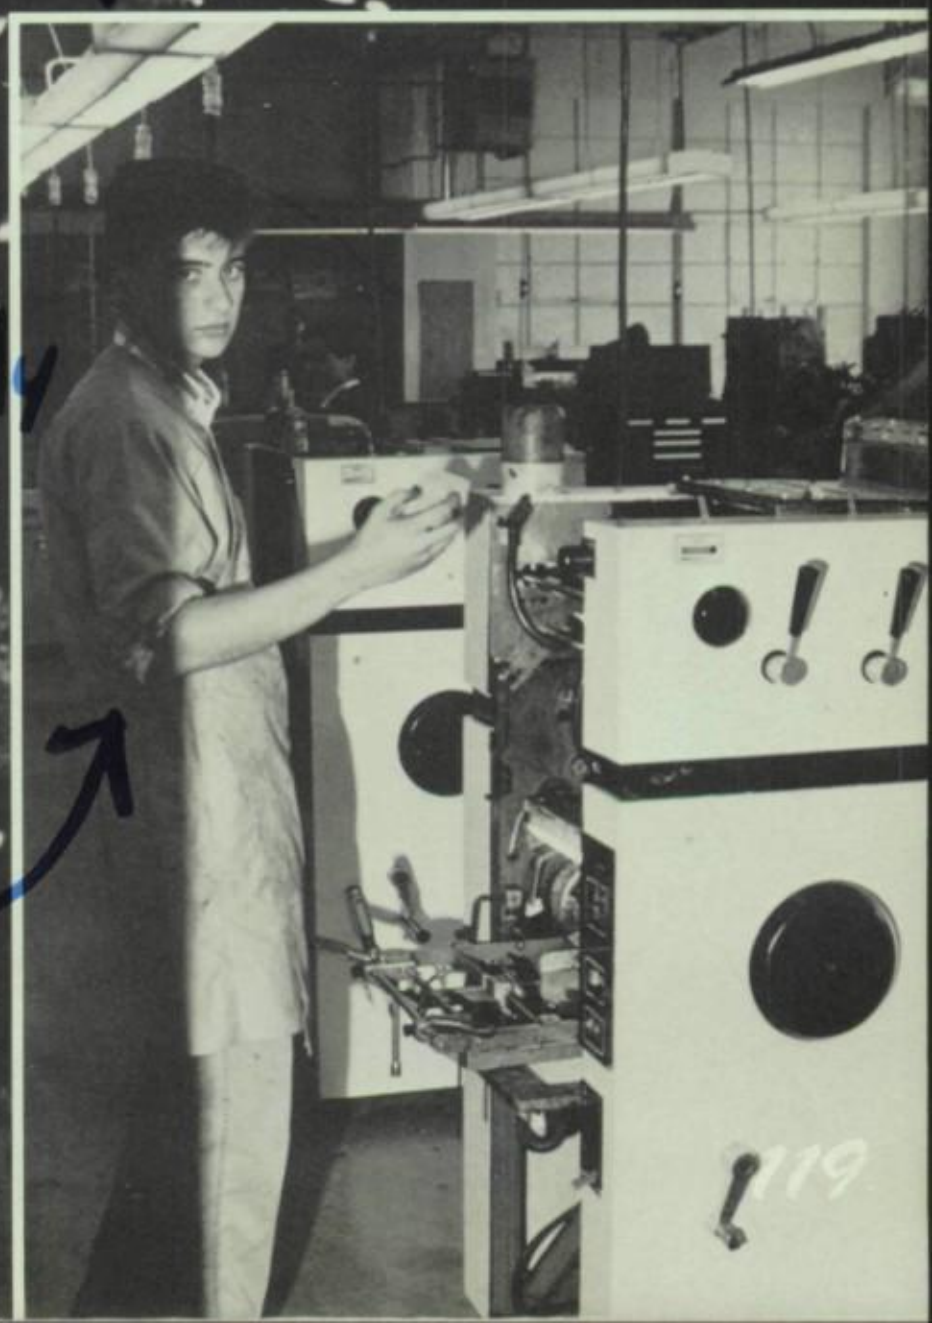
Yahweh, I mean to thank you among the
peoples,
to play music to you among the nations;
your love is high as heaven,
your faithfulness as the clouds.
Rise high above the heavens, God,
let your glory be over the earth!

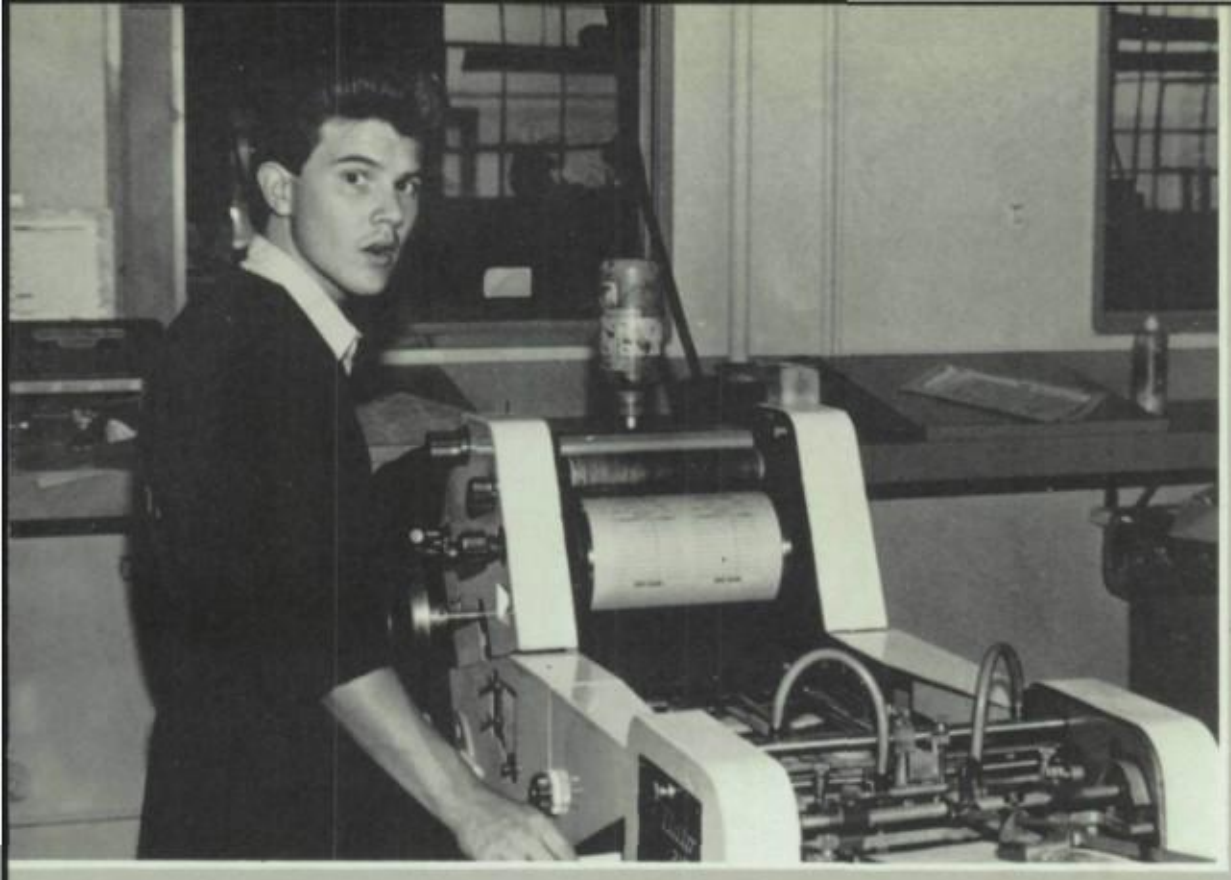
Psalm 108

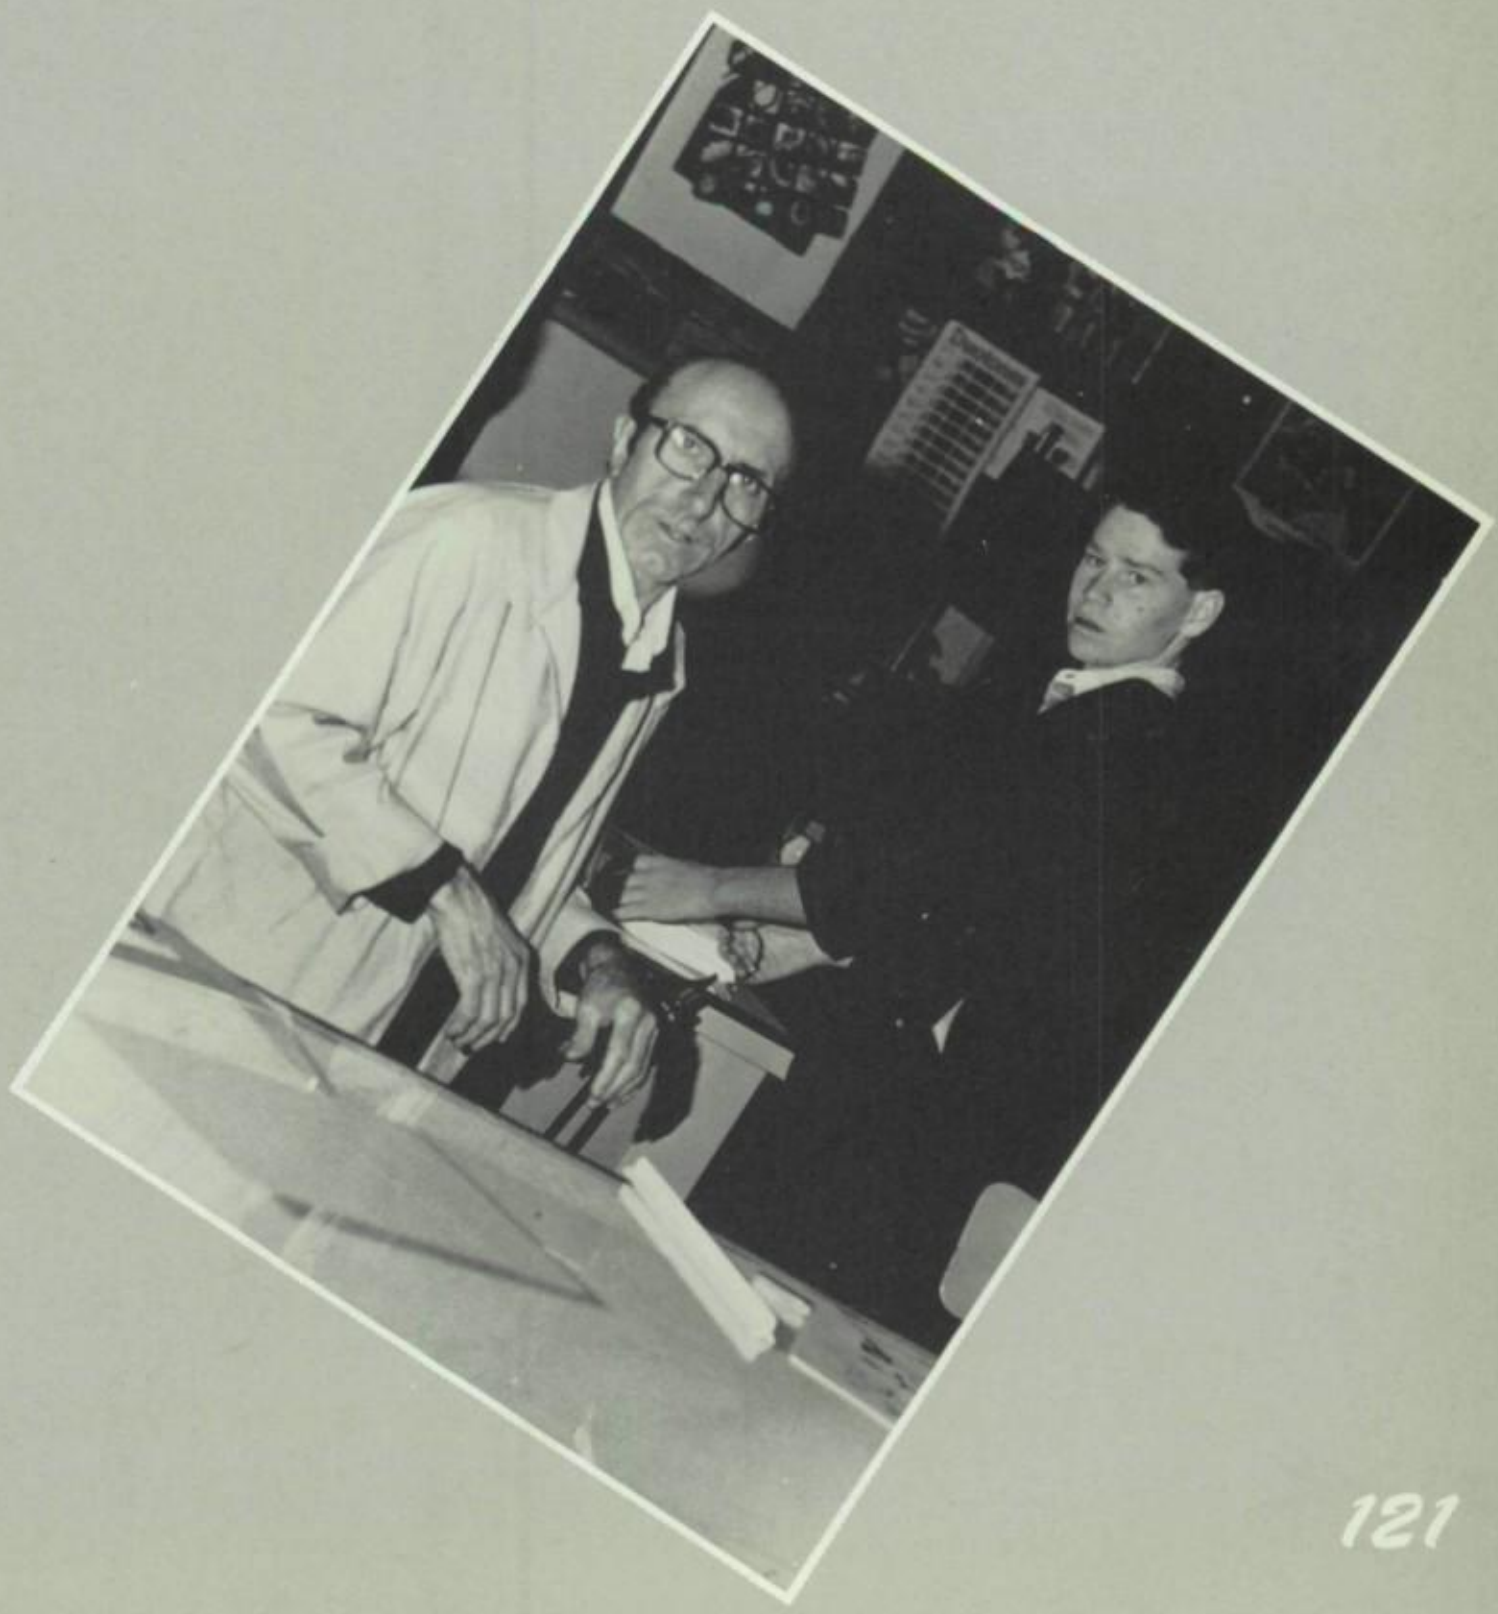
Alex,

Hey guy, the year was stupid, but you just made it worst, I'm just kidding Alex, you know you're cool and everyly polite. Hopefully I'll see your girlfriend from Mexico! Since you always talk about her, don't get drunk, around your girl!

Robert
Mr Nerd







. Thanks to Beckman Instruments, Manufacturing Technology continued this year to introduce its students to the conveniences of the Computer Age.

Manufacturing was one of four technologies or department on campus using nine computers donated this past year by Beckman. While that department used four of the computers to teach word processing to its students, four other units were used by Construction Technology and Materials Science to teach technical report writing. The maintenance department, meanwhile, kept its inventory records on the remaining computer. These units were temporary until Mech Tech received its expected $25,000 share of a $132,000 Weingart grant to the school.

"We plan to purchase 10 Apples and 2 IBMs with our share," explained Mr. Brent Fuhrman last winter. "Manufacturing Technology will have exclusive use of the IBMs for inventory and data control purposes. We'll share the Apple computers with Materials Science, so that department can introduce its students to technical report writing."

In addition to making use of its computer acquisitions this year, Mech Tech worked toward purchasing a computer numerical-control (CNC) lathe, a machine controlled by computer. "We expect to use it for program tooling and providing test samples for Materials Science," Mr. Fuhrman added.

Although Manufacturing formerly produced metal test samples used by Materials Science, the department expanded its production to include plastic and composite test samples. "Each year we provide approximately $10,000 worth of test materials to meet the needs of Materials Science, cutting materials to their specifications and providing a 90% savings on overall costs," Mr. Fuhrman pointed out.

In addition, Mech Tech performed such miscellaneous jobs on campus as making replacement parts for machinery in Graphic Communications and test pieces for the Science Department.

An ambitious $430,000 campaign to modernize the Bosco Tech Materials Science Department was announced last September.

"The campaign is designed to raise funds to move our materials science technology away from its traditional emphasis on metals toward the use of more modern materials like plastics, ceramics, and composites," explained new department chair Tom Cobett.

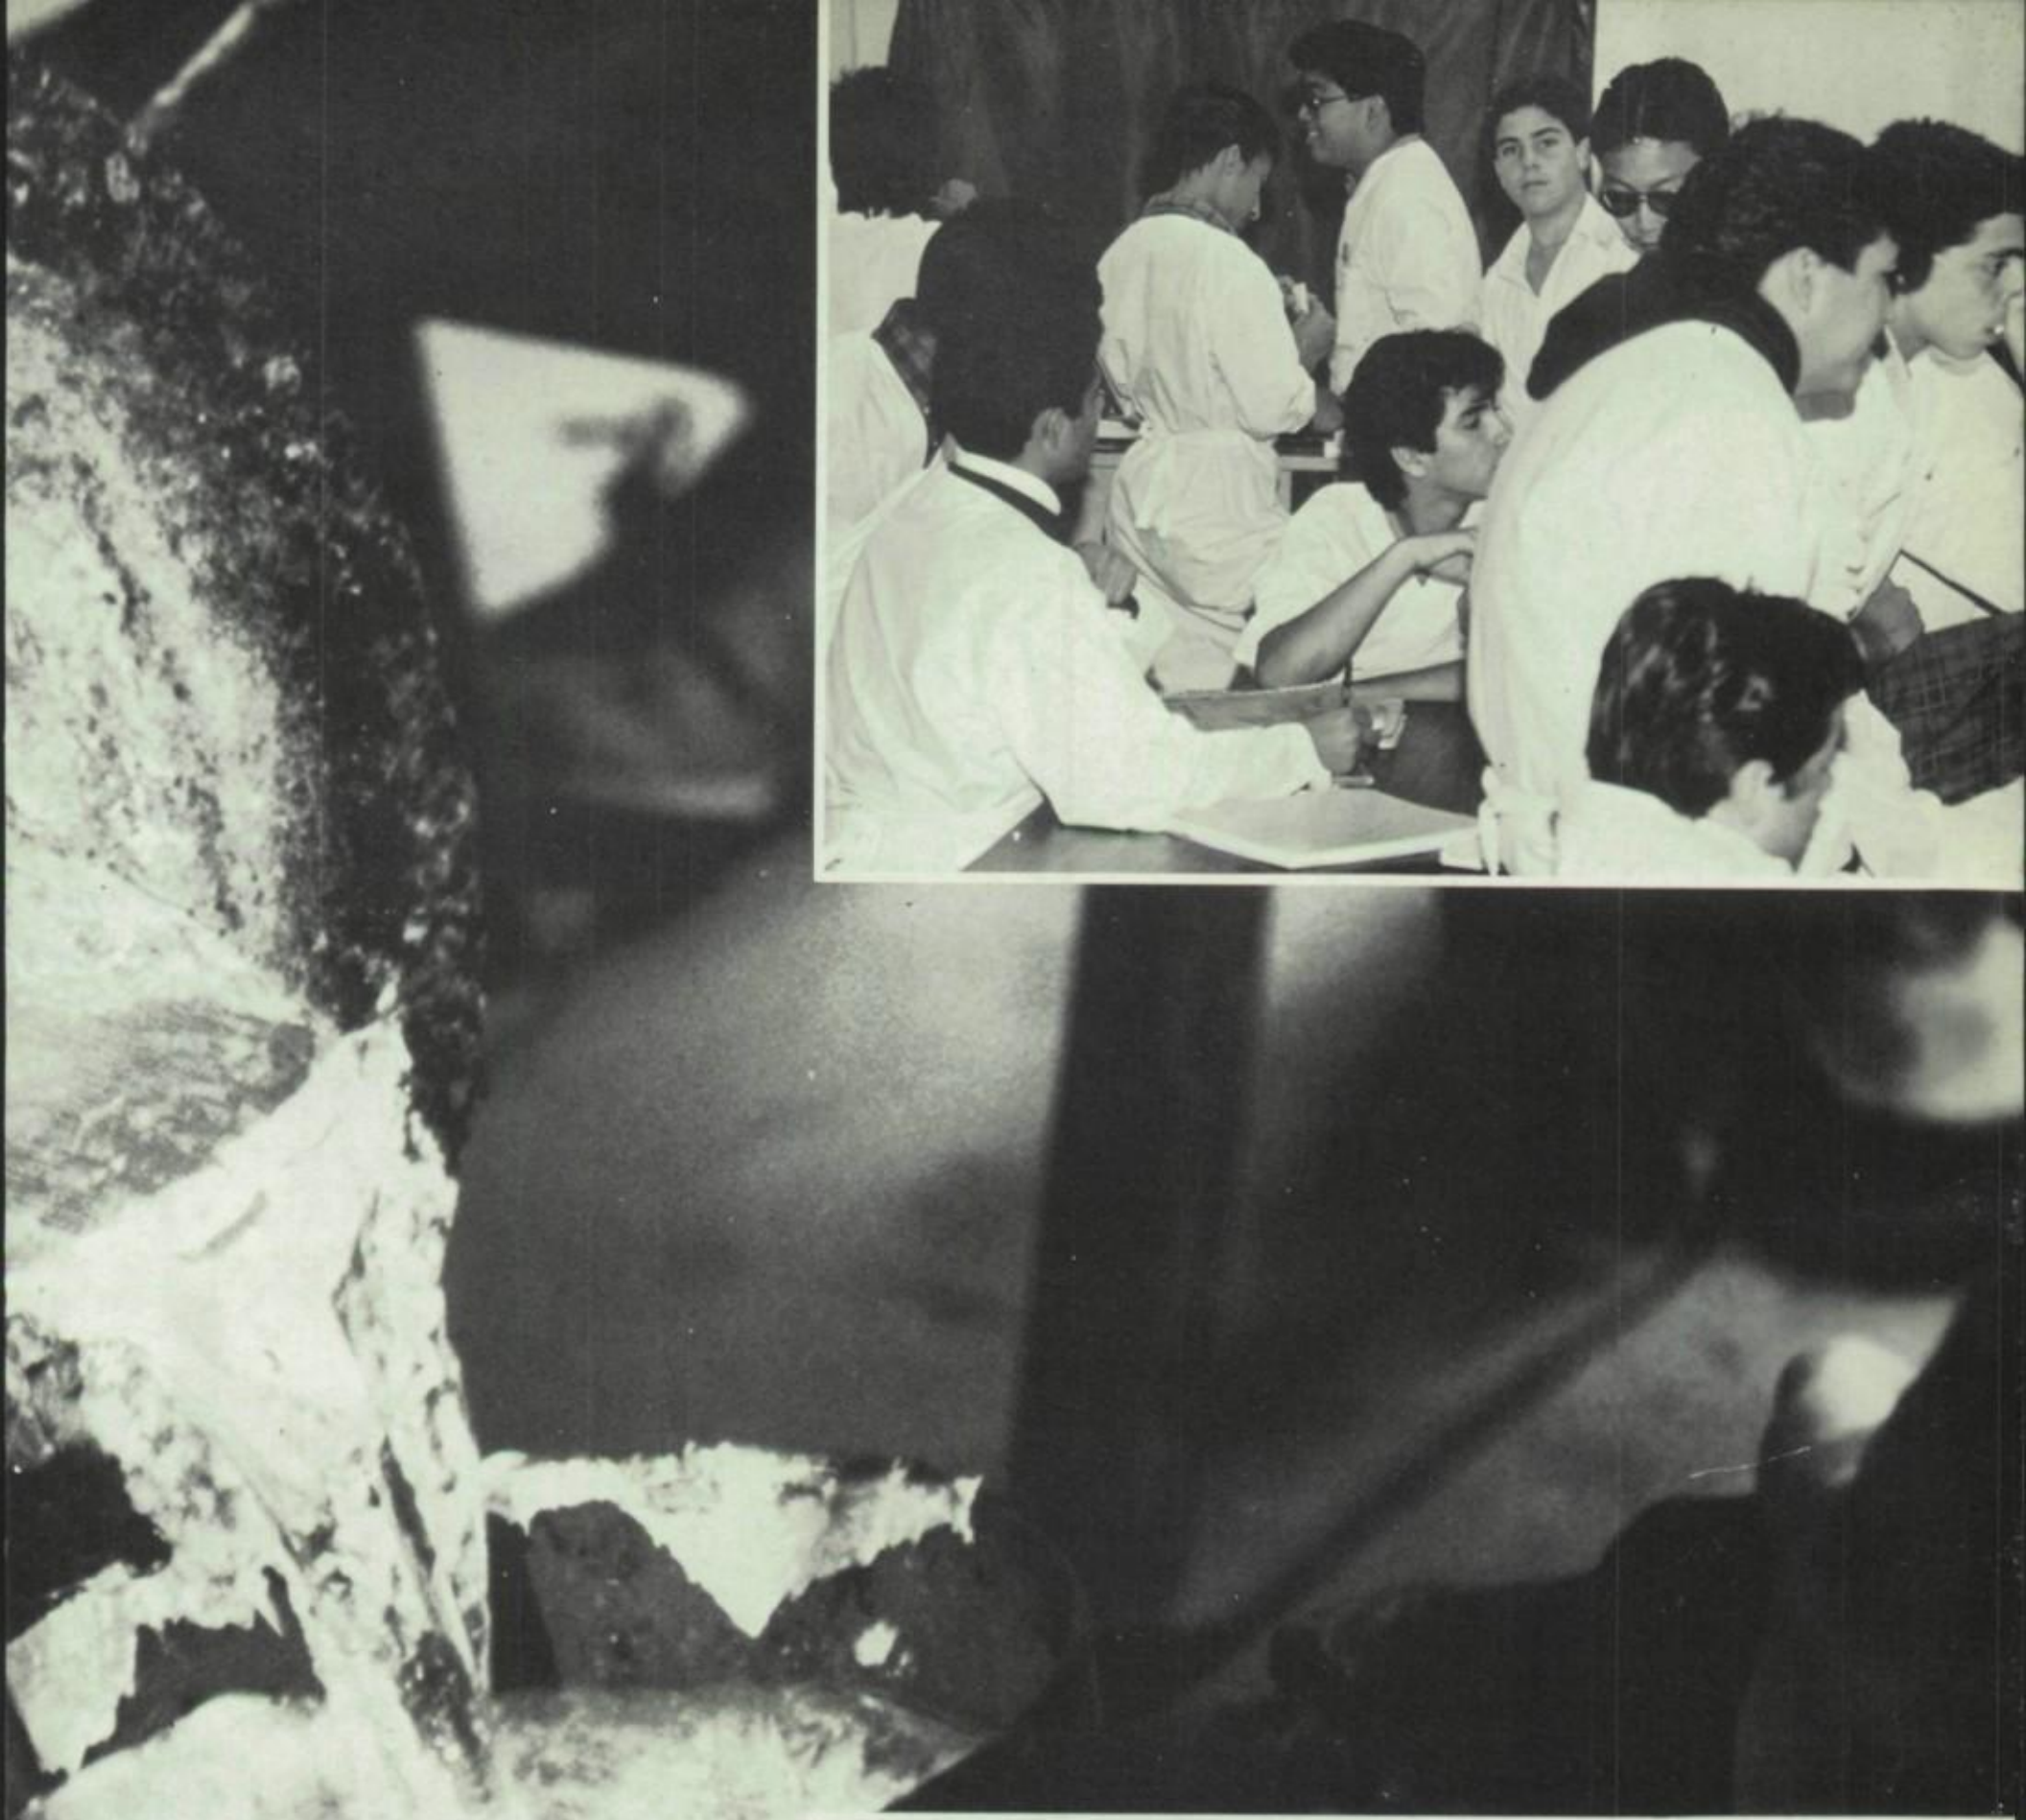
Structural renovation of the existing materials science facility at Bosco Tech is estimated to cost approximately $145,000, while $285,000 is needed to replace obsolete equipment and purchase new equipment capable of dealing with modern materials.

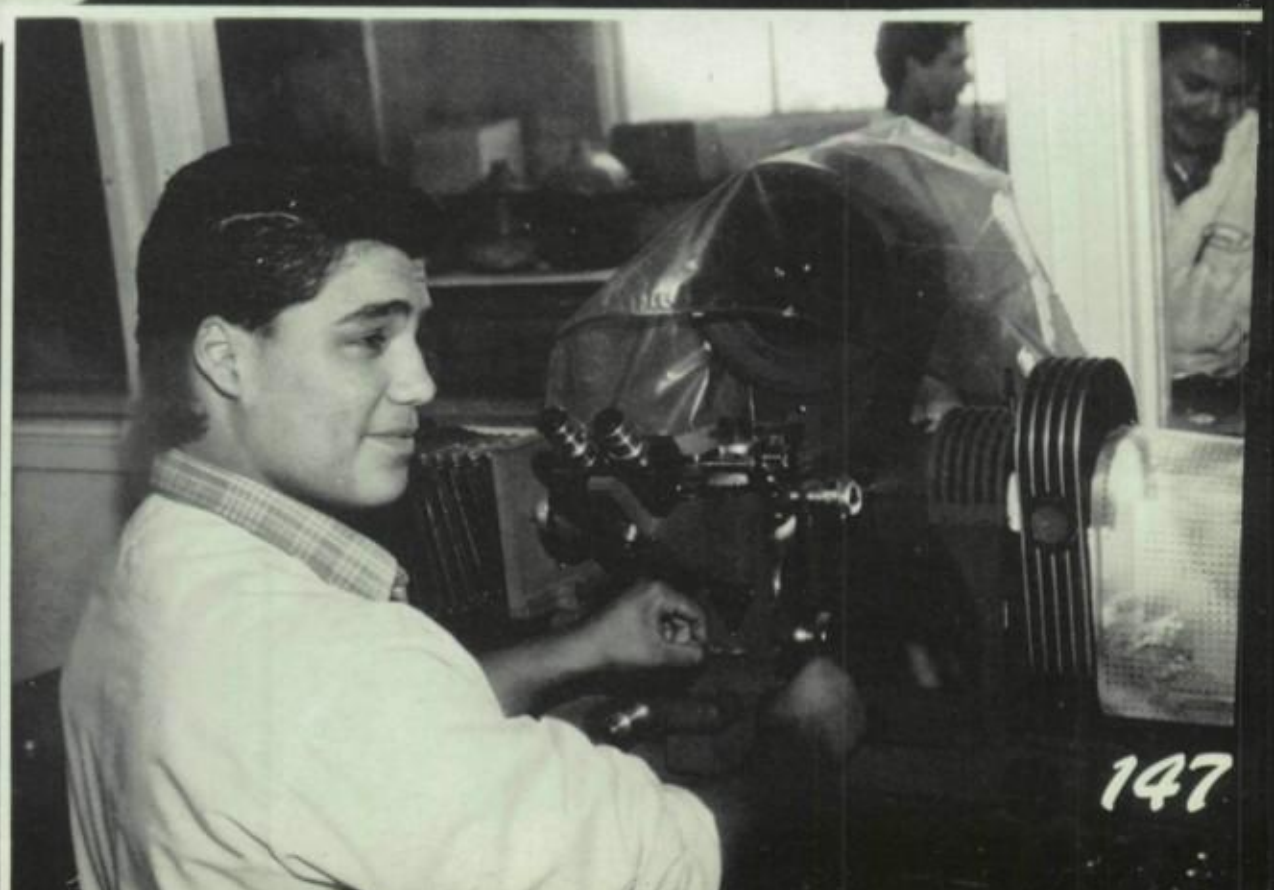
The department has already received commitments from the American Ceramics Society and the Society of Plastic Engineers to help set up lab facilities for instruction in ceramics and plastics.

Mr. Cobett, who was named department chair last summer, holds a B.S. Ed. in industrial arts from Kent State University.

Soon after moving to California in 1981, Mr. Cobett founded Westcast Co., which develops, manufactures, and markets consumable products used in or on foundry sand and liquid metal. Mr. Cobett is also president of Sierra Sealer, Inc., which markets a fire retardant and preservative for cedar shake roofs.

Besides being a part-time faculty member of the Engineering Department at California State Polytechnic University, Pomona, Mr. Cobett is a director of the Southern California chapter of the American Foundrymen's Society. He also serves on the Materials Science Department's technical advisory board.





Ordination of Fr. Jim Nieblas

First Juaneno is ordained into priesthood at Capistrano

By Marla Cone
The Register

When the first Juaneno Indians stepped into the Mission San Juan Capistrano to be converted and baptized two centuries ago, they did so under the guiding hand of Spanish priests.

On Saturday, one of their descendents again stepped into the mission — to be ordained a Catholic priest.

The Rev. James Nieblas, who is one-quarter Juaneno and was raised in San Juan Capistrano, is the first descendent of the Indians to enter the priesthood, Catholic officials said.

The Juanenos were the first residents of south Orange County, roaming the land long before the arrival of the Spanish conquerors and missionaries who converted them to Catholicism.

But Nieblas doesn't see any irony in his forming a bond with those Spanish missionaries. He says he is a priest first and an Indian second.

"My purpose is to predominantly serve the people of God, whoever they are. As an Indian, if anyone is downcast I want to help them," he said. "I want to serve all, not just one group."

Called Jimmy by his friends and family, Nieblas, 39, spent much of his youth at the old mission in the company of its pastor, the Rev. Paul Martin.

"My purpose is to predominantly serve the people of God, whoever they are. As an Indian, if anyone is downcast I want to help them. I want to serve all, not just one group."

The Rev. James Nieblas
newly ordained priest

The 210-year-old mission, which was built by Nieblas' ancestors, always had a special meaning for him, and he dreamed of being ordained there.

"This was his whole life," said Fay McGonagle, Nieblas' mother, as she stood in the mission's courtyard after the two-hour ceremony. "His dream to become a priest finally came true."

Nieblas, wearing a long, white robe, entered the mission with a procession of 40 priests to the chiming of bells — the same sound that Father Junipero Serra used to summon the Indians for the first time in 1776.

In beginning the solemn ceremony, Nieblas told the Most Rev. John Steinbock that he was "ready and willing" to enter the priesthood. About 300 of his friends and family burst into applause when Steinbock, the acting head of the Diocese of Orange, welcomed him.

"We are celebrating together, not only a very joyous, but a very historic occasion," Steinbock said during the ceremony. "We are celebrating the first ordination ... of a person who shares the rich, historic heritage of this land."

Nieblas, who is director of religious education at Don Bosco Technical Institute in Rosemead and was a religious brother for 10 years, sang a hymn for his 87-year-old grandmother, the matriarch of his Juaneno family.

"He's wanted to be a priest since he was a little boy," said his cousin, Jerry Nieblas. "We used to think he was kidding. But this ceremony is a powerful statement (by Juanenos)."

The newly ordained priest said he didn't feel much of a bond to the ancient Indians because "it's hard for me to picture what happened there."

Some critics say California's Indians were enslaved by the missionaries, but others say the Indians willingly supported the mission because they saw the benefits of agriculture and other changes brought by civilization.

"Serra came here to educate, to form industry, to spread Catholicism," Jerry Nieblas said. "Any time there is change, there's going to be a time of rebellion. ... (But) none of us would be Catholic if it weren't for Serra."

As Father Jim has always been a beloved influence here at the Tech, all of us in the Bosco family are proud to extend our prayers, best wishes and love to our newly ordained Father Jim!!

Opposite: The campus Ministry Club, under the direction of Mr. Herrera, pose in the chapel for a group photo.

A Priestly Heart, the Sacred Heart

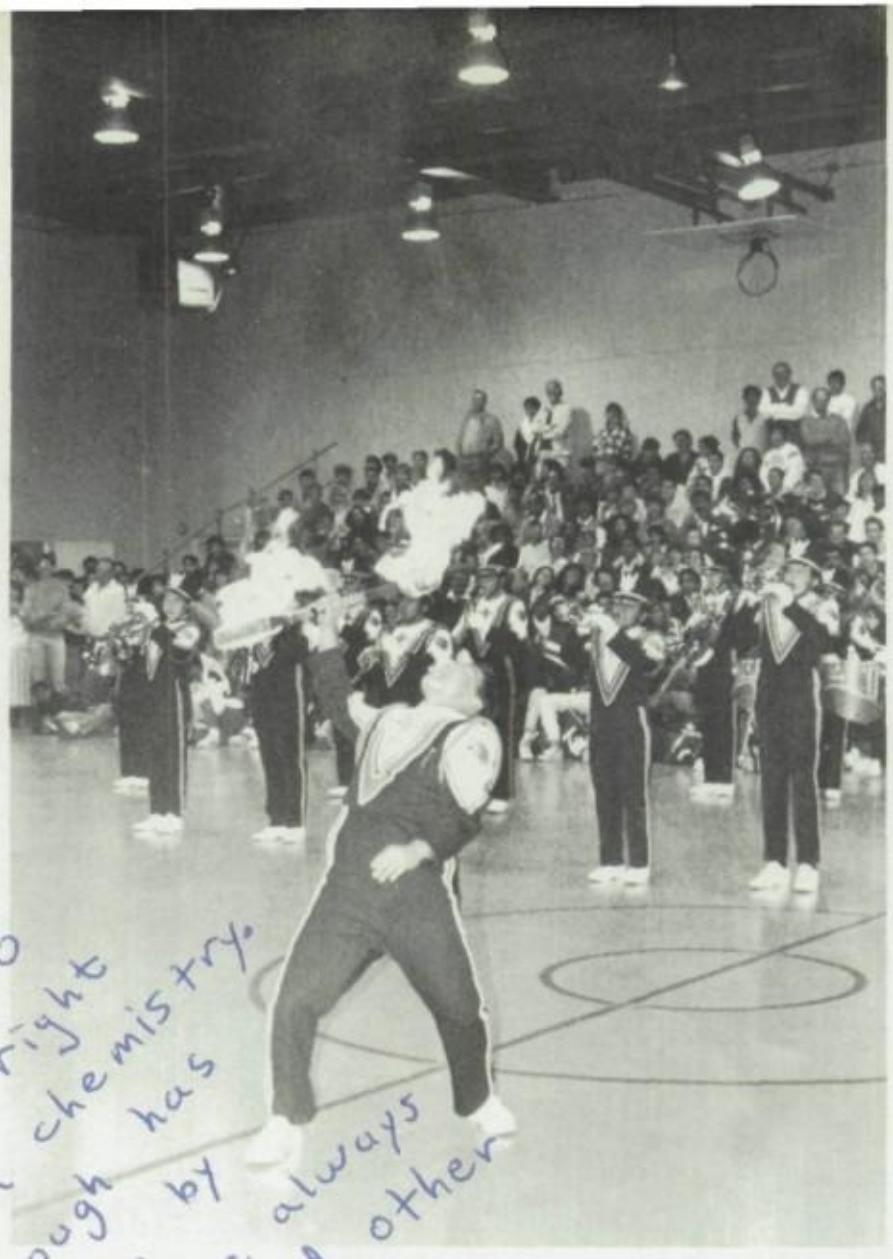
DANCING ON THE CEILING



Alex,
school was about as
boring as listening to
Mrs. Vallie lecture right
now, yes were in chemistry.
Your presence though has
made the day go by
faster because you're always
there for paper and other

thing
I won't tell you to have
a good summer because
no way you can forget
since everyone
has told you

HEY, HEY, WE'RE THE MONKEES*

DANCING ON THE CEILING

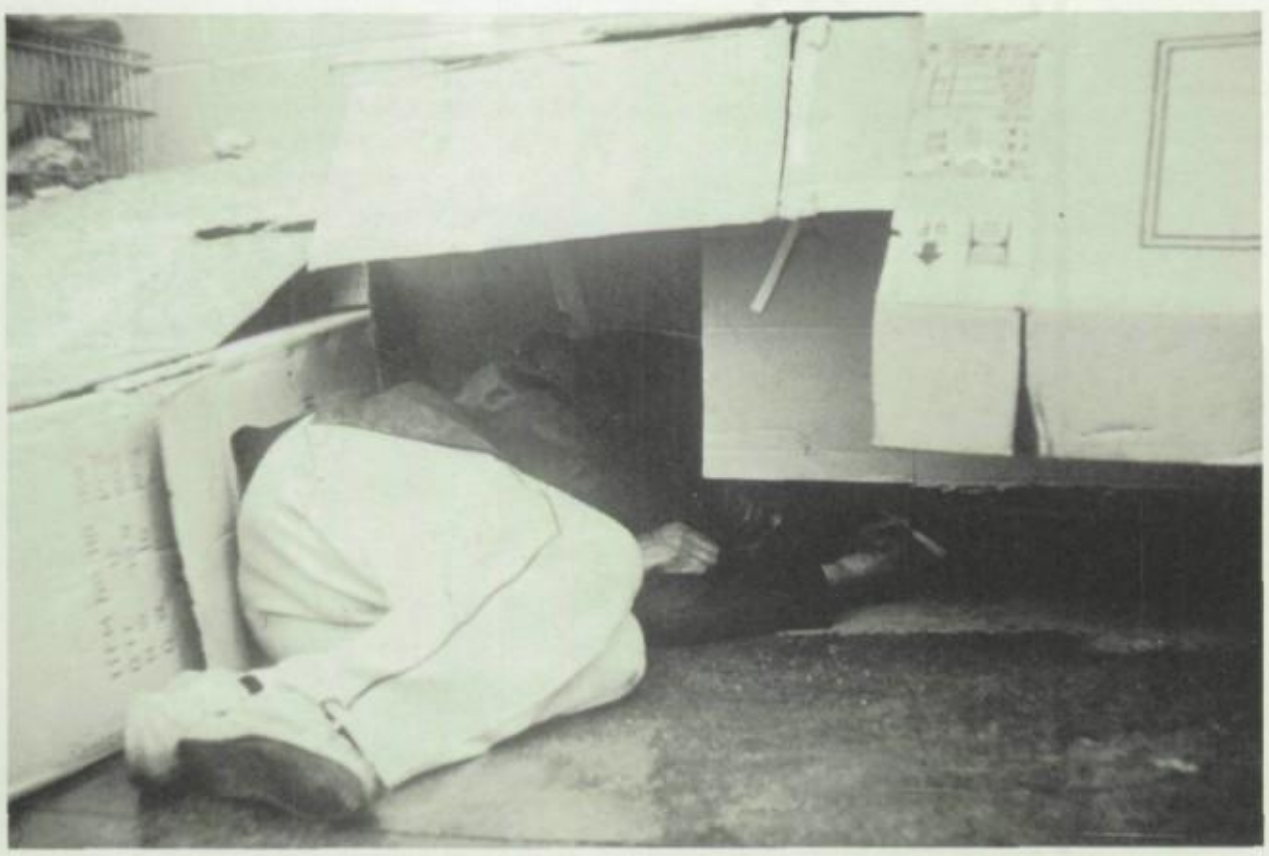
Until next year.
Noel Tagueo

Streets of L.A.

The "Los Angeles Street Experience" became in integral part of the Social Justice program in the Spring semester of 1985. The inspiration from which the "Street Experience" came is Jesus. We know that Jesus was a man of action — reaching out to the outcast of his day with a profound sense of compassion. Jesus ignored the sharp social divisions of his society and focused, instead, on the sacredness of each person. He chose to identify with the outcast and to meet each person as an equal.

One way Jesus expressed his solidarity with all is through the frequent sharing of meals with the outcast. "This man," they said, "entertains sinners and feasts with them." (LK. 15:2) The L.A. Street Experience provides the opportunity for the student to meet the poor on the streets as persons — individuals with names, concerns and a personal history. Only two students are allowed to make this trip to the streets on a scheduled Saturday. We meet with a person from the streets, invite him/her to lunch and talk with them about their life and sometimes about life as a whole. It is at this point in the experience that all involved become students in the truest sense. We sit, listen, respond and learn. As the meal progresses the divisions begin to fade and what is left (to some degree) is the striking realization of our common shared humanity.

Often when Jesus left the poor, they remained poor but they were changed by the encounter. Through the mutual self disclosure during the common meal came the discovery or re-discovery that they were good and worthy of respect. The primary suffering of the poor, then as well as now, is shame and disgrace. As the steward in the parable says, "I would be too ashamed to beg" (LK 16:3) (This past year Mr. Paul Stroup received the "Outstanding Young Men of America" award for his service to the community).



The following excerpts are taken from students' written reflections/reactions to their experience on L.A. Street:

"A trip to the streets of L.A.? When I first heard of this in class I said, 'No way, forget it I don't have to do that, so I won't.' I probably would get jumped or something like that. Still, for some odd reason, I signed up anyway . . .

"His name was Lee, and he was an elderly black man. We ordered food and talked while we ate. He was very hard to understand, but if you listened very carefully you could basically understand what he was saying.

"Lee told us about how last night was kind of cold when he was sleeping. He said he has a family but he was too ashamed to contact them because of his present condition. He told us that he slept on a cardboard and how he found it quite comfortable. Sometimes Lee would stay in a hotel but he could not do so now because of his 'financial problem.'

"Lee does not have anyone to talk with, and everyone seems to ignore him. I think he felt good because we gave him some attention. Even though I could not understand half the things he said, that did not seem to matter. He knew I was trying." — (anonymous)

"John was born in Little Rock, Arkansas in 1913. He, his father and his son had all been in the military. His son had served in the Vietnam War. Although he had never been in battle himself, he had some very strong thoughts about the Vietnam war. John felt that the war was a 'terrible loss of human life.' During the 60's when discrimination was dominant, he was 'put down' by a person he had known for a long time, and a hotel he often stayed at was blown up. I did not catch why and how it came to be that he moved to California and finally ended up on the streets . . .

"In the beginning John seemed as if he knew what we were doing there. When we returned from getting the food, he was very kind. Toward the end of the meal he seemed to know that we had respect for him because he was no longer down on himself."
— (Michael Stannard)

"During our visit with Carlos the one thing he did that I will remember for a long time was to ask Mr. Stroup, with a simple hand gesture, if he wanted to share the french fries with us. This really struck me. It really made me think. I mean, here's a guy who has nothing but the clothes on his back, lives in the street, and is still willing to share his food with someone else."

Yearbook

This year I would like to thank the following people for their assistance and to acknowledge their contributions to the 1987 TECHMAN. First, to Mr. Richard Demeter for his literary skills in writing several articles on current developments and changes in the technologies. Second, to Mrs. Grimaldi, whose pleasant manner always has a way of obtaining and renewing our patron ads. Third, to Sal Muro and Steve Fawver, both graduates of the Tech, who although they are busy in new capacities, graciously gave their skills in helping to finalize layouts.

A very warm thanks to Mr. Cone; Ms. Hobbs; Ray Villasenor; Doug Klotz; and Lai Cheung for their talents in photographic coverage of campus events. Thanks are also extended to Watson's Studio and Cantrell Photography for individual and group shots of students and faculty and to Mr. Harmon, a very professional and patient photographer who didn't mind coping with Highland Avenue traffic and threat of rain as we photographed the unique cover of this year's annual. A special thanks to the Wings Skydiving Team for their exciting and successful demonstration of aerial skills during the Freshman Picnic and in providing us with a video tape of the event. Thanks also to Mantooth Photography and our yearbook helicopter pilot who battled high winds in order to take photos of the Tech from the air.

Sincere appreciation is extended to all students, parents and faculty for their patience in forming the various numerical configurations for each class year which were photographed from the air on that day: To Mr. Aguanno, for his creative and spirited coverage of the Freshman picni skydiving event, and to Fr. Nick for his flashy yuppie shorts on that day, not to mention having the guts to show his legs! . . . We all still love you Fr. Nick! Warm thanks to Arista Records for providing special photos of Miss Whitney Houston and to the Los Angeles Philharmonic Association and the Hollywood Bowl for their sincere interest and cooperation in helping the TECHMAN actualize a unique cover (in all the good old USA) for the 1987 annual.

All of the enlarged shop photos in this year's book would not have been available without the keen abilities of the MMA studio in Burbank. I thank them for not only providing all photos of the Tech, but also for including the Tech in a student-oriented motivational film and brochure which receives national exposure in over 60% of all schools in the United States. Many, many thanks! Finally, a very special thanks you to the Taylor Publishing Company and especially to Mrs. Jane Kasel, our yearbook representative, for her professional assistance and insight and even beyond that for her very gracious personal support in our undertaking.

Since a yearbook is usually the single most expensive, time consuming and highly visible promotional device of any institution, the help and cooperation of all is essential. It has always been the policy of this department and I would like to affirm it at this time, that any ideas or suggestions for theme, pictures, layout, artwork, body copy or inspired brillance, be freely directed to the yearbook office. This year, all reasonable effort, and then some, has been made to create a desirable and marketable product which illustrates the high quality institution that we in fact are. For now, I again offer my heartfelt thanks to all those who made a contribution to the 1987 annual and wish God's bountiful blessings upon all of us.

Yours sincerely,
Mr. Robert D. Bernoskie

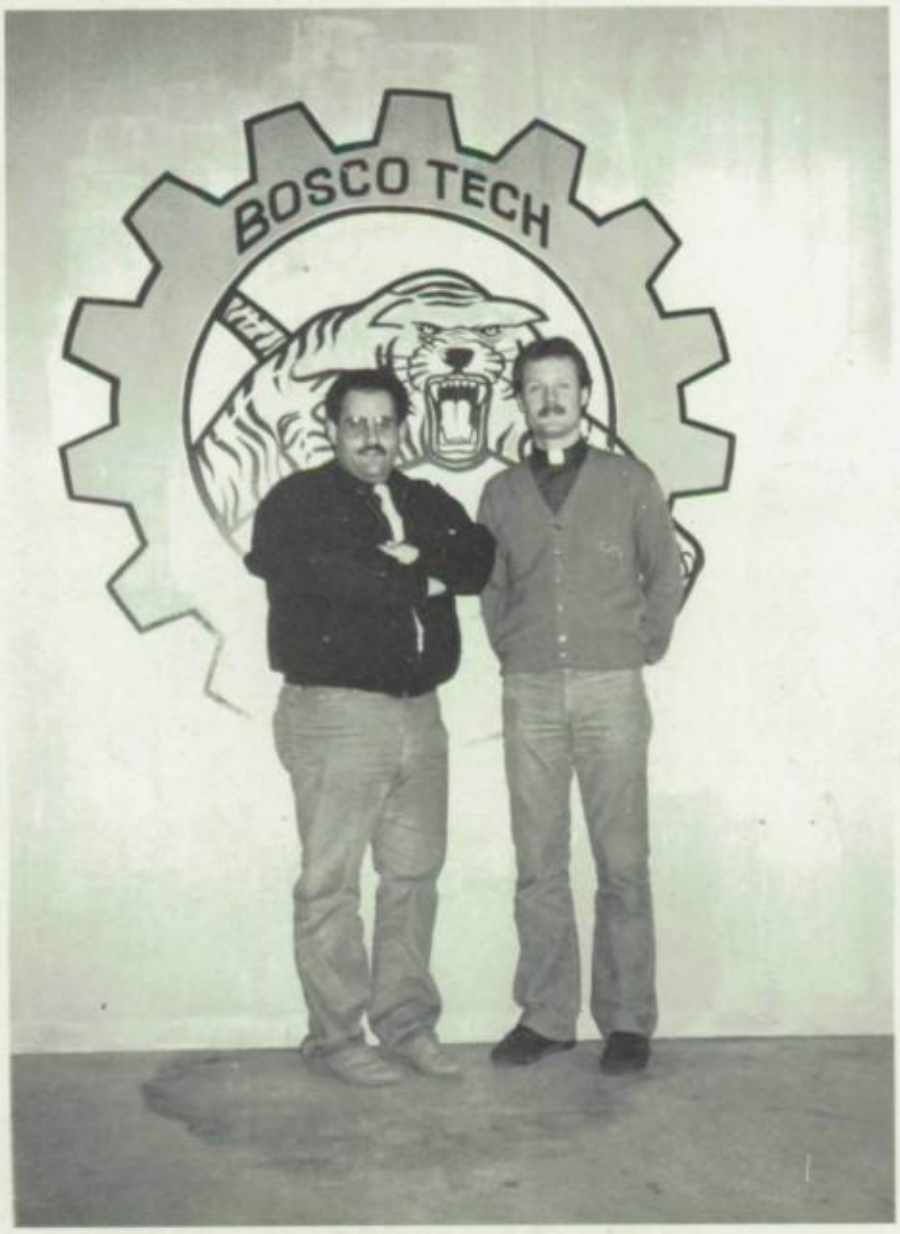
On the Move

We Did It Our Way

Student Council



Yes, we can make it happen!

This was the positive theme which this year's Student Council adopted in the summer months before classes began. This group of students better known as "The Council" knew they were responsible for the student pride and enjoyment of Tech students his year. The Council began this year by attending a 3 day Leadership Workshop at Mount St. Mary's College to prepare themselves for the upcoming year. Taking what was learned there, the summer meetings began and the organization and direction of the Council was set. They were determined to be a major impact on the lives of Tech students and provide the memories which make High School so Special. The dances, assemblies, Gradnight, and the Prom are all activities which we remember most about our High School years. The Council literally skydived into the year with a successful freshman picnic which featured a skydiver. The first dance could be put in our record books as being the most successful and full dance in our history of neighboring schools. Over 1,400 people were entertained that evening! As the year progressed we set our sights on other goals. The first of which was to promote our newly elected Mascot, The Tech Tiger. The Council held the elections last year and this year were determined to paint a mural. For year students have wanted a mascot and a picture of it in the gym, this year the dream came true and with full cooperation of administration, athletics, and faculty, The Council was able to paint our mascot proudly in the Gym.

The Council wishes all of you one last message: "Don't ever stop dreaming; don't ever stop believing; strive for the best and all you can accomplish. Don't let anybody ever tell you that you can't, because you can . . . You can make it happen!!!"

Rafael Garcia, President; Sergio Macias, Vice-President, Alberto Telfair, Secretary; Louis Koutsky, Secretary; Ricardo Gonzales, Treasurer. Also, Steve Hernandez, Ray Villasenor, Carlos Miranda, Joey Rodriguez, Dennis Portello, Chris Levia, and Greg Mucino.

Congratulations Bob:
I thank my God always, making mention of you in my prayers,
because I hear of your love, and of the faith which you have toward the Lord Jesus, and toward all the saints;
and I pray that the fellowship of your faith may become effective through the knowledge of every good thing which is in you for Christ's sake.
For I have come to have much joy and comfort in your love, because the
hearts of the saints have been refreshed through you, brother.
